Question1: Make policy decisions based on careful consideration of the future in light of escalating national debt.

Question2: Identify product needs through impartial research and design farm policy to fulfill these needs.

Question3: Distribute assistance to producers based on an efficiency module incorporating environmentally correct practices, rather than on farm size and production levels.

Question4: Expand farm programs to include private forest lands. Extend agricultural program benefits based on producer achievement of conservation and environmental goals.

Question5: Assist farmers in identifying niche markets, producing organically grown products, and marketing these products.

Question6: Expand our domestic and foreign agricultural markets by focusing on organic and specialty crops, utilizing renewable energy sources, and focusing research activities into more innovative areas.
