Question1: Consider loans for new farmers.

Question2: Let the United States set the world standard in quality of food and the entire agricultural system. We can start by improving the conditions of farm animals. Consumers believe that animals are treated in a humane manner. Lets create minimum standards with enforceemnet in this arena. Another area is food quality and safety again let enforce existing regualtions, while they are improved with higher standards.

Question3: Move from a system of government subsidies and benefits to the largest farmers, who may not provide the best conditions for farm animals or maintain the highest quality.

Question4: Reduce intensive farming practices for the benefit of rural residents near large farms, animals that are kept and suffer greatly in the most restrictive environments, and the environment.

Question5: By increasing the quality of farm products and transitioning to less intensive farming methods. Employment opportunities for rural populations may improve.

Question6: Ways of reducing agricultural demands on energy and natural resources need to examined.

However, not at the cost of reducing quality standards or animal welfare.
