

**EDWARD L. KORWEK, Ph.D., J.D.**, is a partner in the Washington, D.C., law firm of Hogan & Hartson L.L.P. He has a doctorate degree in biochemistry and law degree. He is a former scientist with the National Cancer Institute with a special expertise in biotechnology-derived products, particularly foods and drugs. For nearly 20 years he has been involved in the subject of biotechnology regulation, a topic he has written extensively about. Mr. Korwek is the author/editor of the *1997 United States Biotechnology Regulations Handbook*. He has been on numerous other governmental advisory committees pertaining to the subject of biotechnology, such as the NIH Recombinant DNA Advisory Committee, the U.S. Congress, Office of Technology Assessment Advisory Committee on New Developments in Biotechnology, the Agriculture Biotechnology Research Advisory Committee, and the National Research Council, Commission on Life Sciences, Committee on Scientific Principles Underlying Environmental Release Decisions Involving Biotechnology. His practice in the food and agriculture area involves providing advice on all aspects of FDA, USDA, and international regulation of foods and food ingredients, including on GRAS and prior-sanctioned substances, and on ingredients and foods that are recombinant DNA-derived. Specific areas of his food practice include advising on food additive considerations, including what is a food additive, direct and indirect additive petitions, food irradiation, and secondary direct food additives, and standards of identity. Mr. Korwek also provides regulatory advice on GRAS petitions and food labeling, particularly labeling of biotech foods, and on other FDA and USDA issues, such as those pertaining to nutrition labeling, product fortification and recalls, and export issues. Mr. Korwek is or was a member of the Editorial Advisory Board of the *Biotechnology Law Report*, the *Food and Drug Law Journal*, and the *Journal of Biotechnology in Healthcare*. He is also a member of the Board of Directors of the Food and Drug Law Institute and a member of several legal and scientific associations, such as the American Bar Association, the American Association for the Advancement of Science, and the American Chemical Society.
