National Animal Identification System

2

December 30, 2003

USDA announced they would implement a national animal identification system

April 27, 2004

\$18.8 CCC to support initial development of the National Animal Identification System (NAIS)

- Implementation to start on a voluntary basis
- Eventual requirements for premises and animal identification

Safeguarding Animal Agriculture

National Animal Identification System

Why does USDA APHIS want Animal ID?

3

To establish the foundation for an animal information system necessary to support our animal disease control, eradication, monitoring and surveillance programs.

Safeguarding Animal Agriculture

National Animal Identification System

4

GOAL

The goal of the NAIS is to have the capability to identify all animals and premises that had direct contact with a foreign animal disease (FAD) or disease of concern within 48 hours after discovery.

Safeguarding Animal Agriculture

National Animal Identification System

5

“Standards”

... critical to achieve national identification

Safeguarding Animal Agriculture

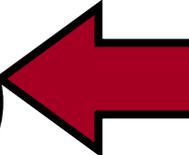

National Animal Identification System

6

Standard:

US Premises Identification Number

- Unique number entire United States
- Format
 - 7 characters
 - Example: A23T567

Right most character is a check digit

Safeguarding Animal Agriculture

National Animal Identification System

7

Standard:

- Animal ID
- Group/lot ID

Safeguarding Animal Agriculture

National Animal Identification System

8

Animal Identification

Individual Animals

Standard: Individual Animal Identification

- ❑ Country Code (3 numeric) 840 = USA
- ❑ 12 digit animal number

Example: 840002 134 567 892

Safeguarding Animal Agriculture

National Animal Identification System

9

Animal Identification

Group/Lot of Animals

Identifying a Group or Lot of is applicable when the entire group moves through the production chain as one unit.

Standard #3 Group/Lot Identification Number (page 16)

- Premises ID number
- Date the group was created

Example: A23T567 103002

National Animal Identification System

10

NAIS "systems" components:

- National Premises System
- National Animal Identification & Tracking

Safeguarding Animal Agriculture

National Animal Identification System

11

1st Priority - Premises Registration

Why is premises identification so important?

... a “must have” to track livestock movements.

The unique National Premises Identification

Number provides the capability of the system to determine commingling of cattle at the location.

Safeguarding Animal Agriculture

National Animal Identification System

12

National Premises System

- Premises Number Allocator
- Premises Registration System
 - States/Tribes responsible for the administration of premises registration
- National Premises Information Repository

Safeguarding Animal Agriculture

National Animal Identification System

13

National Premises System

□ Premises Number Allocator

- Generates a nationally unique number
- 7-character ID - Example: **A123R69**
- Location (Address, GPS, Township/Range/Section)
- Developed and maintained at CEAH

Safeguarding Animal Agriculture

National Animal Identification System

14

National Premises System

□ Premises Registration Systems

- Standard Premises Registration System (SPRS)
 - Provided by USDA APHIS
 - Developed 2003/04 by WI Livestock ID Consortium
 - No cost to acquire system (developed with federal funds)
 - Now “housed” and maintained by CEAH
 - Web based; each state has secured/partitioned area

Safeguarding Animal Agriculture

National Animal Identification System

15

National Premises System

□ Premises Registration Systems

- Standard Premises Registration System (SPRS)
 - Proposed by USDA APHIS
 - Developed 2002/04 by W/L Livestock ID Consortium

– **37 States and 3 Tribes have requested the SPRS**

– **28 States and 2 Tribes are currently operational**

Safeguarding Animal Agriculture

National Animal Identification System

16

National Premises System

□ Premises Registration Systems

- Compliant Premises Registration Systems
 - State or 3rd Party developed, supported and maintained

Safeguarding Animal Agriculture

National Animal Identification System

17

National Premises System

□ Premises Registration Systems

- Compliant Premises Registration Systems
 - State
 - 3rd Party developed, supported and

- **5 CPRS**

- (3) States: NE, PA, CA (OR uses CA)

- (2) 3rd Party: GAM – ID, UT, NV

- : RMS – CO, NM, AZ &

- 2 tribes

- **3 additional system under review**

Safeguarding Animal Agriculture

National Animal Identification System

18

National Premises System

□ Premises Registration Systems

- 38 state and 4 tribes are now operational
- Goal is to have all States “operational” on premises registration by July 2005

Safeguarding Animal Agriculture

National Animal Identification System

19

National Premises System

□ Premises Registration Systems

- 40,000 premises have been registered through NAIS
- 133,000 premises numbers have been allocated for all programs (END accounted for large percentage)

Safeguarding Animal Agriculture

National Animal Identification System

20

NAIS "systems" components:

- National Premises System
- National Animal Identification & Tracking

Safeguarding Animal Agriculture

National Animal Identification System

21

National Animal ID & Tracking System

- AIN Management System
- Animal Identification & Tracking Systems
 - Standardized Animal ID & Tracking System
 - Compliant Animal ID & Tracking System
- National Animal Records Repository

Safeguarding Animal Agriculture

National Animal Identification System

22

AIN Tags

- AIN tags are the de-facto standard for certain species when visual, unique individual animal identification is necessary.
- The basic requirements:
 - Tags are designed for one-time use (tamper evident).
 - Tags cannot be readily altered.
 - The AIN and US Shield must be imprinted on the tag.
 - The printing on the tag must be easily readable for the life of the tag.

Safeguarding Animal Agriculture

National Animal Identification System

23

AIN Tags

- Cattle industry recommends ISO 11748 and 11785 compliant radio frequency identification ear tags
- RF/AIN tags have 15 digit code printed on the tags
- Meets minimum AIN TAG requirements
 - Tamper evident
 - Number printed on the tag

Safeguarding Animal Agriculture

National Animal Identification System

24

National Animal ID & Tracking System

- **Reporting animal locations/movements**
 - ✓ **“Point of Origin” ID**

Achieved with the allocation of the ID Tag to a Premises and recording the allocation.

Safeguarding Animal Agriculture

National Animal Identification System

25

National Animal ID & Tracking System

- **Reporting animal locations/movements**
 - ✓ **“Point of Origin” ID**
 - ✓ **Interstate Movements**

Safeguarding Animal Agriculture

Animal Identification System

26

Animal ID & Tracking System

Animal locations/movements

"Point of Origin" ID

Interstate Movements

✓ Termination (Slaughter Plants)

Safeguarding Animal Agriculture

National Animal Identification System

National Animal ID & Tracking System ²⁷

- **Reporting animal locations/movements**
 - ✓ **“Point of Origin” ID**
 - ✓ **Interstate Movements**
 - ✓ **Termination (Slaughter Plants)**
 - ✓ **Markets/Assembly Points/Feedlots**

Safeguarding Animal Agriculture

National Animal Identification System

28

....an enormous undertaking that can only be successful with an industry/government partnership!

Thank You!
