

## Asian Longhorn Beetle

Mysterious, dramatic music - -

**John Walsh:** I'm John Walsh and this time I'm here to talk about America's *least* wanted – the Asian Longhorn Beetle. It's killing our trees – as it eats our forests, parks and even your own back yard. We can't stop it without your help. If you think you've seen this beetle which is an inch long, black and white and with antennae as long as it's body – please contact your local Plant Protection and Quarantine office. Look now, before it's too late, this beetle is hungry – it's out there!
