

USDA Climate Hubs for Risk Adaptation and Mitigation to Climate Change

USDA Regional Hubs for Risk Adaptation and Mitigation to Climate Change

Today's Topics:

Climate Hub overview

Climate Hub regions & locations

Inter- and intra-agency
cooperation

What's next

What are the Climate Hubs?

Vision: Agricultural production and natural resources maintained and strengthened under increasing climate variability and environmental change

Mission: To develop and deliver science-based, region-specific information and technologies to agricultural and natural resource managers that enable climate-smart decision-making and provide assistance to enable land managers to implement those decisions.

Conceptual Framework for a USDA Regional Hub

Science and Technology providers:

Federal Partners

NOAA RISA
USGS CSC
DOE
NASA
etc

USDA Intramural
Research
(ARS/FS/ERS/NRCS)

USDA Extramural
funded Research
(NIFA)

Non-Federal Partners

Agricultural
Experiment
Stations
Many others

Science
Coordination,
Synthesis, and
Tools

Links with other Hubs & National Coordinator

Technology Transfer providers:

Cooperative
Extension

USDA Service
Centers

Forest Service
Threat Centers

Others

Stakeholders and Stakeholder group: Farmers / Ranchers / Forest Managers /
Tribes / States / Feds / LCCs / Others

Information and tools

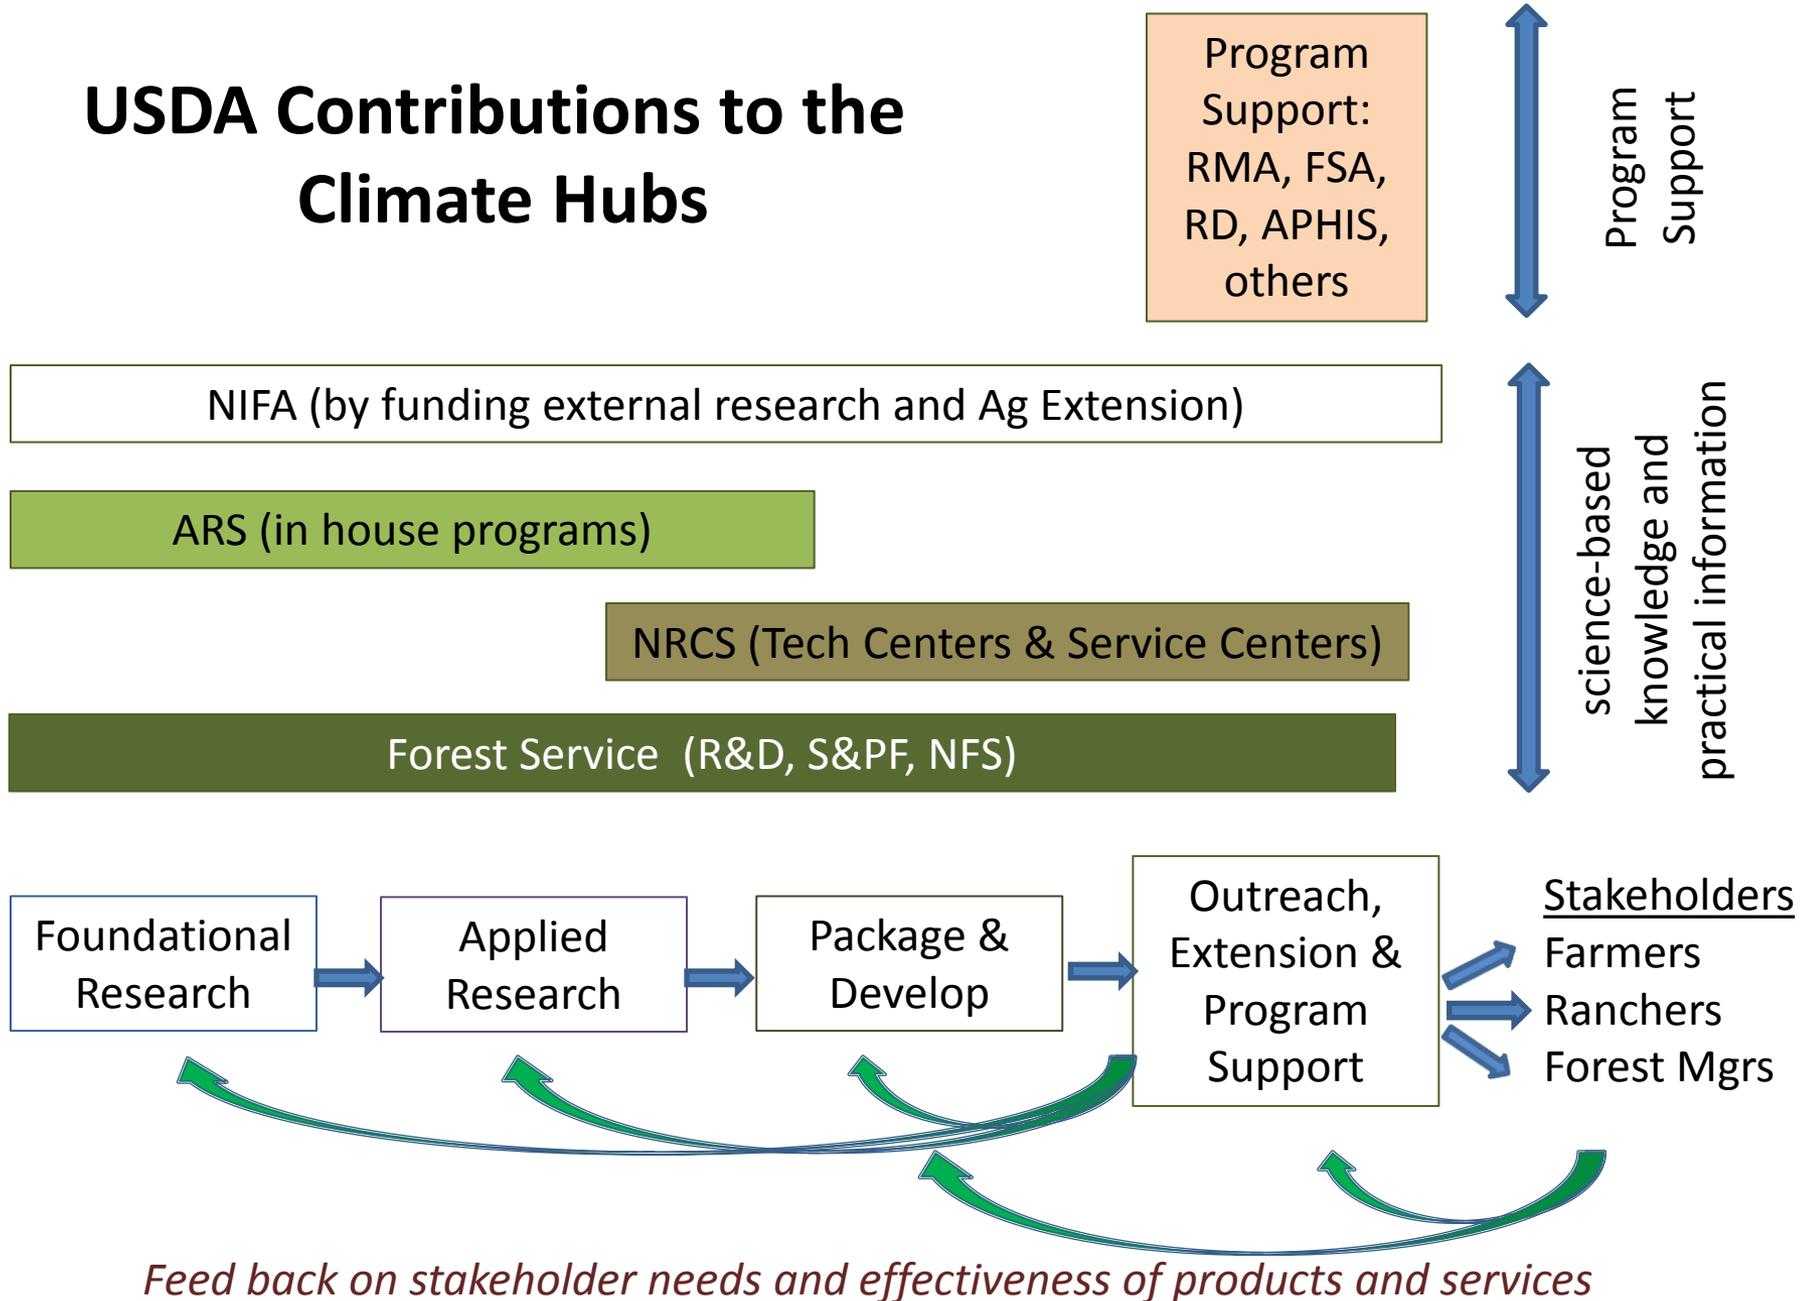

Questions and feedback

USDA Regional Climate Hubs (*with our Partners*) will provide:

- **Science & Science Translation**
- **Technical & Program Support**
- **Assessments and Forecasts**
- **Outreach and Education**

USDA Contributions to the Climate Hubs

Where are the Climate Hubs?

USDA Climate Hubs for Risk Adaptation and Mitigation to Climate Change

Forest Service Lead

Corvallis, OR

Pacific Northwest

Davis, CA

Southwest

Northern Plains
ARS Lead

Fort Collins, CO

ARS Lead

El Reno, OK

ARS Lead

Las Cruces, NM

Southern Plains

ARS Lead

Ames, Iowa

Houghton MI

Midwest

Southeast

Forest Service Lead

Durham, NH

Northeast

Forest Service Lead

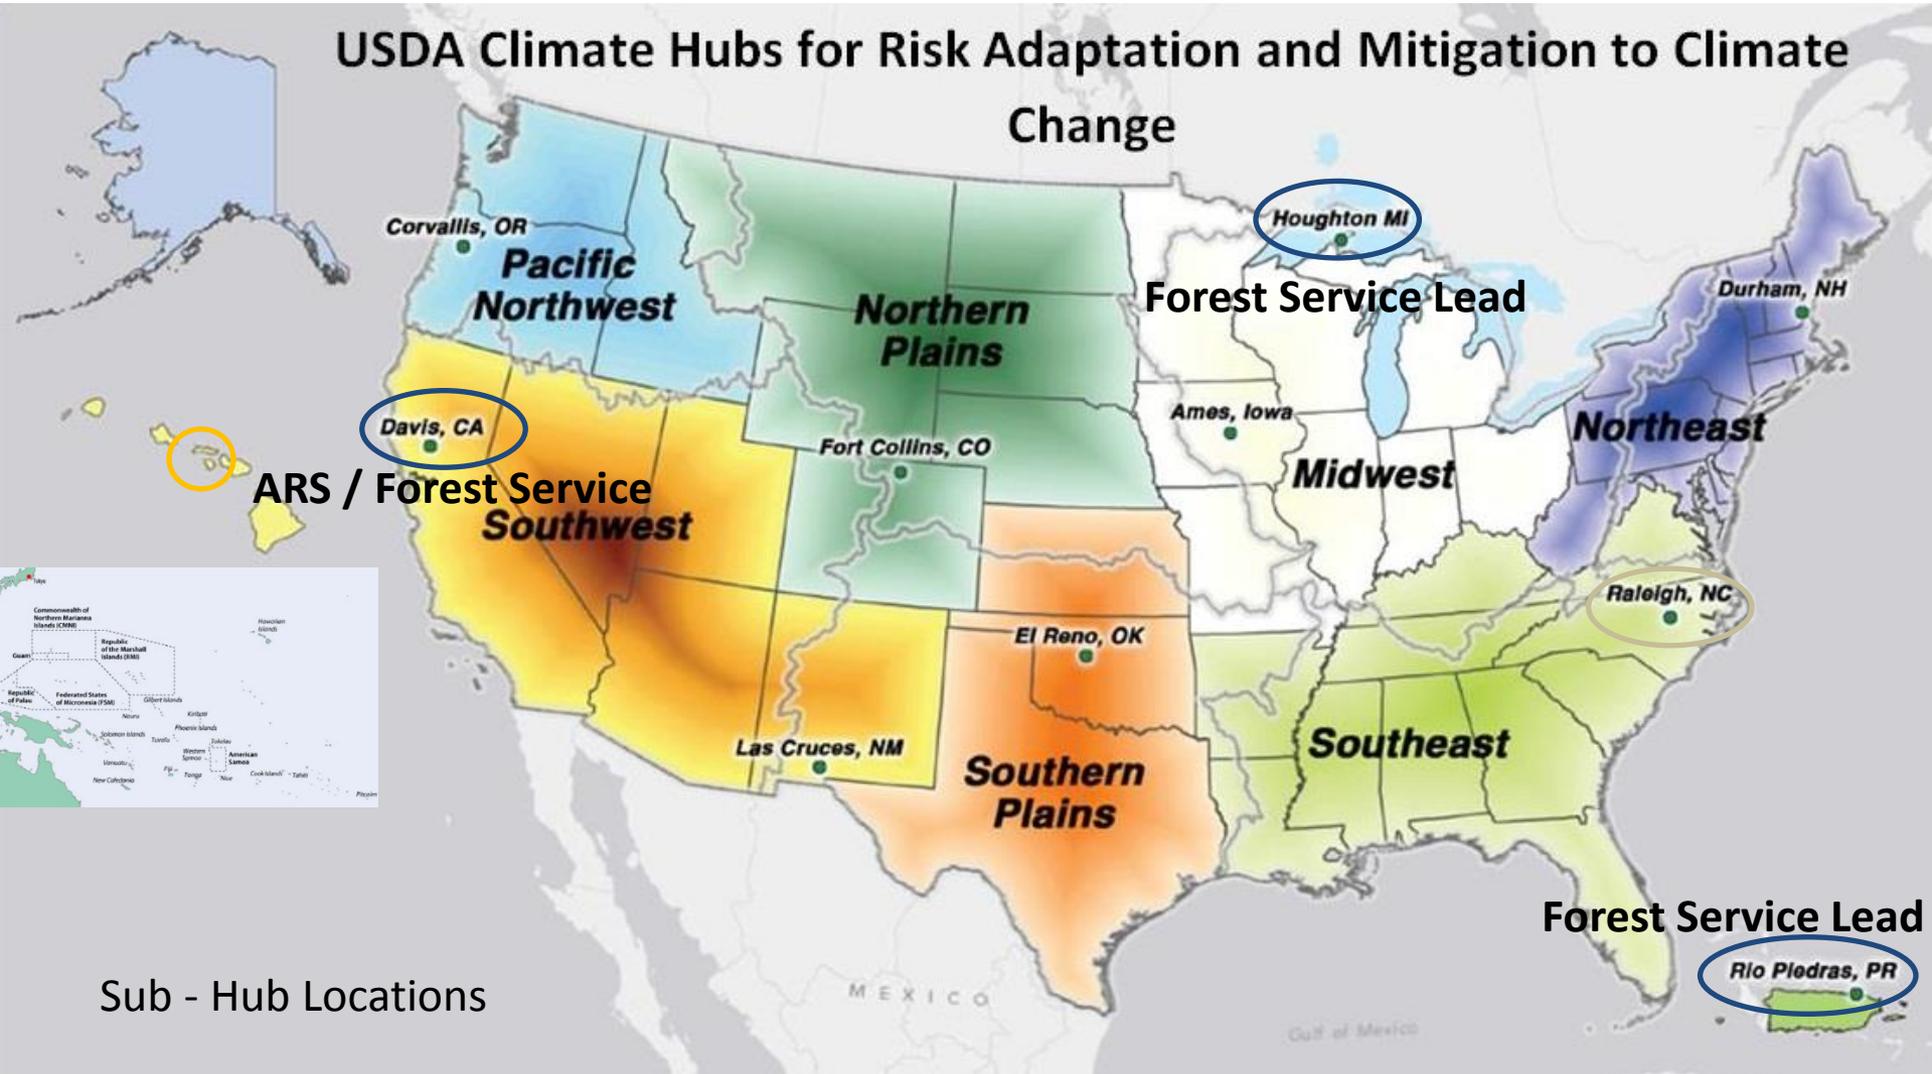

Raleigh, NC

Rio Piedras, PR

Regional Climate Hub Locations

USDA Climate Hubs for Risk Adaptation and Mitigation to Climate Change

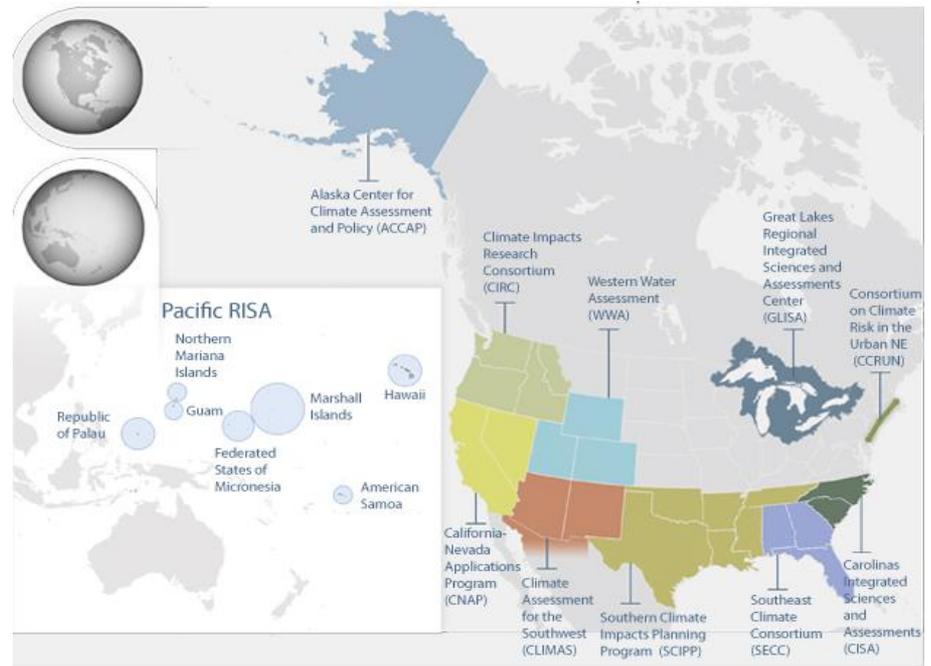

**Coordination with other federal
regional climate efforts**

USGS Climate Science Centers

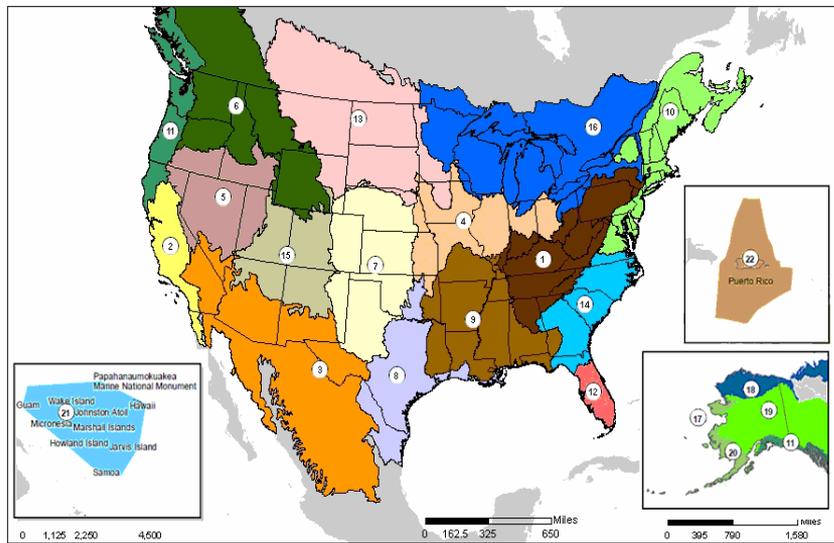

Other federal regional efforts associated with climate change

NOAA Regional Integrated Science and Assessments

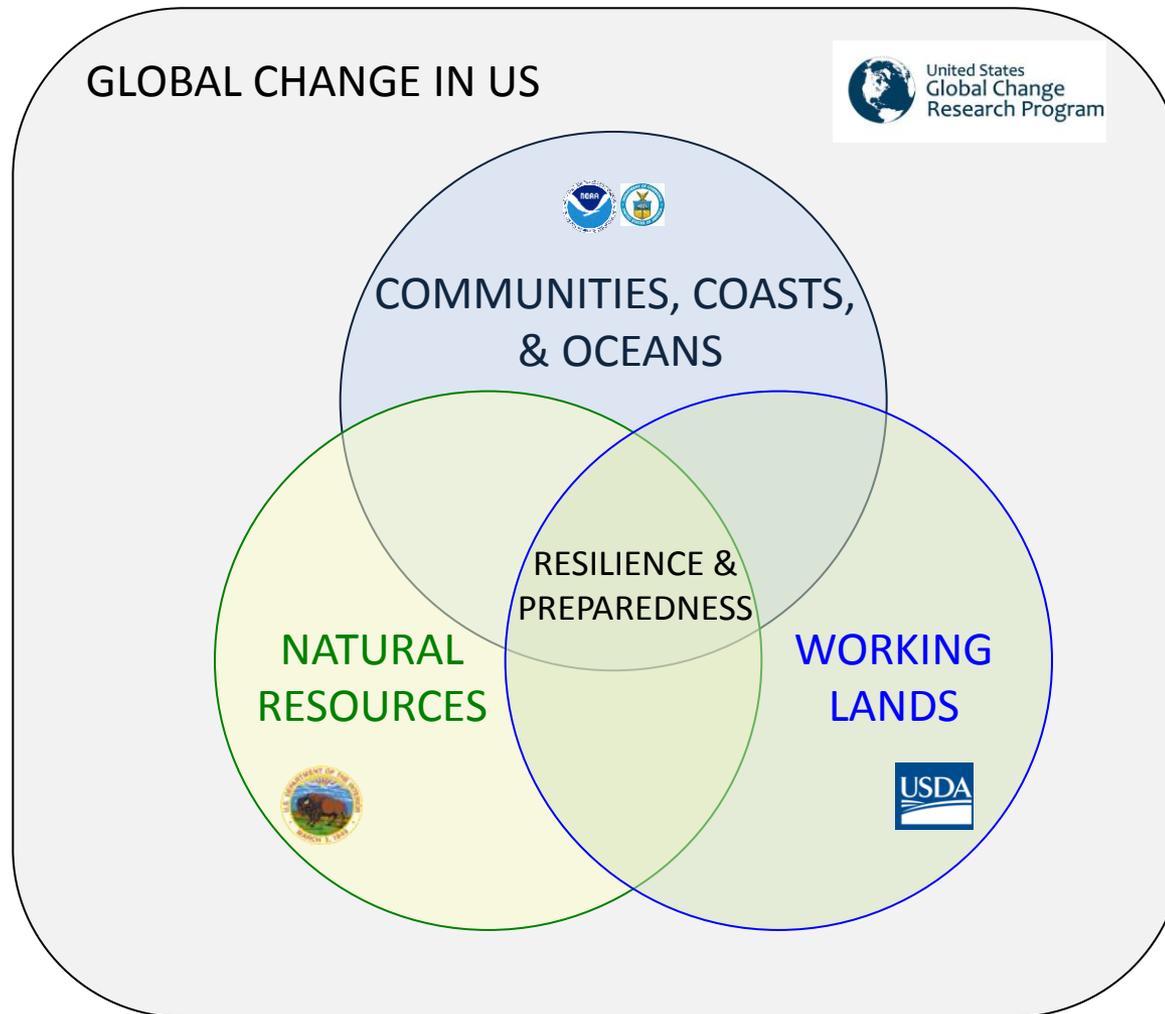

FWS Landscape Conservation Cooperatives

- | | | | |
|---|-----------------------------------|-------------------------------------|----------------------|
| 1. Appalachian | 7. Great Plains | 13. Plains and Prairie Potholes | 19. Northwest Boreal |
| 2. California | 8. Gulf Coast Prairie | 14. South Atlantic | 20. Western Alaska |
| 3. Desert | 9. Gulf Coastal Plains and Ozarks | 15. Southern Rockies | 21. Pacific Islands |
| 4. Eastern Tallgrass Prairie and Big Rivers | 10. North Atlantic | 16. Upper Midwest and Great Lakes | 22. Caribbean |
| 5. Great Basin | 11. North Pacific | 17. Aleutian and Bering Sea Islands | Undesignated |
| 6. Great Northern | 12. Peninsular Florida | 18. Arctic | |
- Albers Equal Area Conic NAD83
Produced by FWS, IRTM, Denver, CO
Map Date: 12/4/2011

We can't respond to global change in isolation

What's next for the Hubs?

February-December 2014

- Assess regional vulnerabilities to ID most pressing issues
- Establish work plans
- Work with partners and stakeholders to access needs and capabilities
- Establish web presence

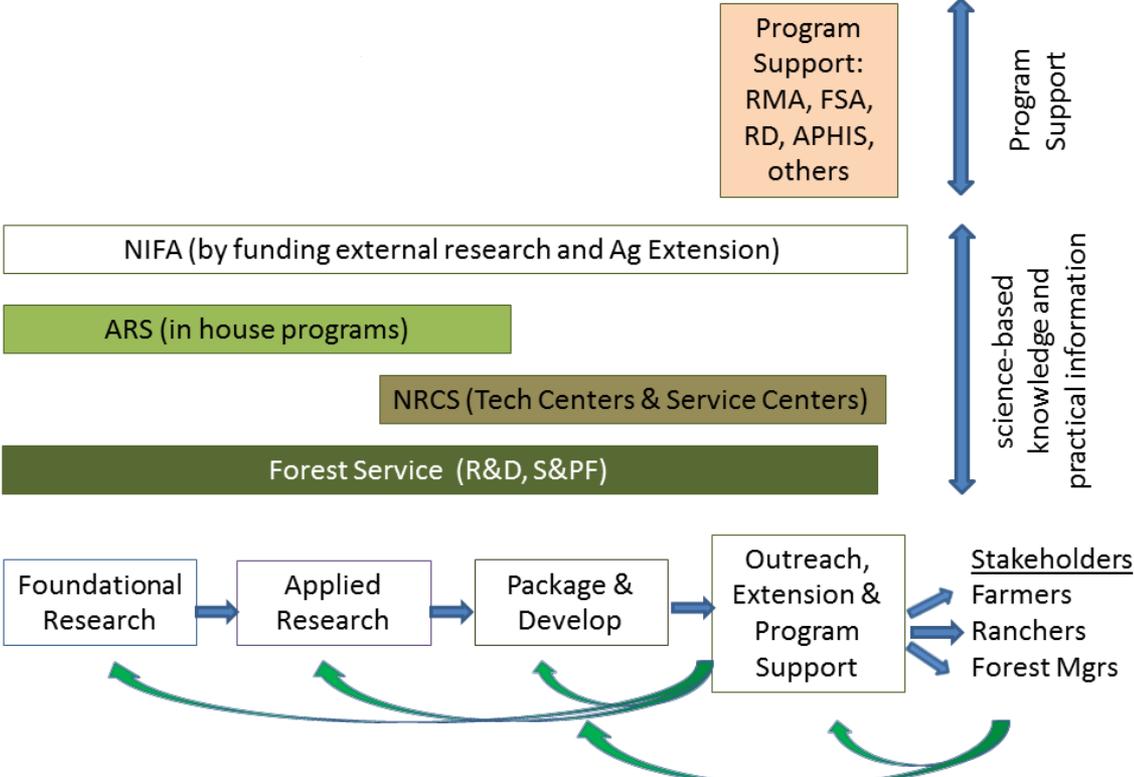

- Assess regional vulnerabilities to ID most pressing issues

- What resources are currently most vulnerable to direct and indirect impacts of climate change
- What may be vulnerable in the near future
- What should be the first priority areas for a Climate Hub to address

- Establish work plans (who does what?)

Partners

Feed back on stakeholder needs and effectiveness of products and services

- Work with **partners** and stakeholders to access needs and capabilities

- State Agricultural Experiment Stations
- State Cooperative Extension Programs
- Department of Interior USGS Climate Science Centers
- DoI FWS Landscape Conservation Cooperatives
- NOAA Regional Integrated Sciences and Assessments Program (RISAs)
- Cooperative Ecosystem Studies Units (CESU) Network

- Work with partners and **stakeholders** to access needs and capabilities

Natural Resources

- collaborate with CSCs, LCCs and other regional groups

Agriculture

- Underrepresented in many regional climate change efforts

- Establish web presence

USDA OFFICE OF THE CHIEF ECONOMIST
 United States Department of Agriculture

USDA Regional Climate Hubs

USDA Climate Hubs for Risk Adaptation and Mitigation to Climate Change

Click on a region to learn more about the USDA Climate Hub in your area.

What are USDA's Regional Climate Hubs?

USDA's regional hubs will deliver information to farmers, ranchers and forest landowners to help them adapt to climate change and weather variability. The Hubs will build capacity within USDA to provide information and guidance on technologies and risk management practices at regional and local scales. To learn about how climate change and weather variability are affecting agriculture in your area, click on a region of the map above. For more information on the Climate Hubs, check out the following resources:

- USDA Regional Hubs for Risk Adaptation and Mitigation to Climate Change Factsheet
- Climate Hubs Charter
- To learn more about USDA's approaches to climate challenges, visit the [USDA Climate Solutions](#) page.

Climate Hubs in the News

- Press Release: [Secretary Vilsack Announces Climate Hubs Locations](#) (February 5, 2014)
- Press Release: [Secretary Vilsack Outlines Vision for Agricultural Solutions to Environmental Challenges](#) (June 5, 2013)
- Remarks as Prepared: [Agriculture Secretary Outlines Vision for Agricultural Solutions to Environmental Challenges in Speech to the National Press Club](#) (June 5, 2013)

- Some level of consistency over 7 Regional Climate Hubs
- Coordination with other government web sites
- “One stop shopping”
- Legacy web sites
