WASDE - 658

Approved by the World Agricultural Outlook Board

March 11, 2025

NOTE: The *WASDE* report only considers trade policies that are in effect at the time of publication. Further, unless a formal end date is specified, the report also assumes that these policies remain in place.

U.S. Tariffs on Canada and Mexico have been suspended until April 2 for all products covered under USMCA, which include most agricultural products in the *WASDE*. Reciprocal tariffs are also scheduled to begin on April 2. However, until these are in effect, *WASDE* does not incorporate them into commodity forecasts. Despite U.S. tariffs being suspended, Canada's retaliatory tariffs remain in place. These are accounted for in *WASDE* estimates and are assumed to continue. U.S. tariffs on China and China's retaliatory tariffs on the U.S. are assumed to remain in place.

WHEAT: The outlook for 2024/25 U.S. wheat this month is for larger supplies, unchanged domestic use, lower exports, and higher ending stocks. Supplies are raised on increased imports, up 10 million bushels to 140 million on a continued robust pace. By-class increases were made to Hard Red Spring (HRS) and Durum. Wheat exports are lowered 15 million bushels to 835 million, based on Census exports through January and expectations for sales and shipments for the remainder of the marketing year. By-class reductions were made to HRS, Soft Red Winter, and Durum. Projected 2024/25 ending stocks are raised 25 million bushels to 819 million, up 18 percent from last year. The season-average farm price is reduced \$0.05 per bushel to \$5.50 on NASS prices reported to date and price expectations for the remainder of the marketing year.

The global wheat outlook this month for 2024/25 is for larger supplies, higher consumption, reduced trade, and increased ending stocks. Supplies are projected up by 5.4 million tons to 1,066.7 million, mainly on increased beginning stocks for Turkey and higher production for Australia, Argentina and Ukraine. Australia's production is raised 2.1 million tons to 34.1 million, which is Australia's third largest production on record. This is based on the latest ABARES estimate, where most of the higher production was in Western Australia and New South Wales. Turkey's 2024/25 beginning stocks are raised 2.2 million tons on a multi-year downward revision in its food, seed, and industrial usage. Global consumption is raised 2.9 million tons to 806.7 million, primarily on higher feed and residual use for Australia, EU, and Thailand. World trade is 0.9 million tons lower at 208.1 million on decreased exports for EU, Russia, and the United States. China's imports are reduced 1.5 million tons to 6.5 million and are less than half of its 2023/24 imports. Projected 2024/25 global ending stocks are raised 2.5 million tons to 260.1 million, mostly on increases for Turkey, Argentina, the United States, Australia, and Russia.

COARSE GRAINS: This month's 2024/25 U.S. corn outlook is unchanged relative to last month. The season-average corn price received by producers is unchanged at \$4.35 per bushel.

Global coarse grain production for 2024/25 is forecast 3.2 million tons higher to 1.496 billion. This month's foreign coarse grain outlook is for larger production, reduced trade, and smaller ending stocks relative to last month. Foreign corn production is higher as increases for India, Russia, and Ukraine are partly offset by declines for South Africa and Mexico. India is raised reflecting increases to both area and yield; the latest information from the government indicates greater planted area, while yield prospects are higher on exceptional kharif monsoon season rainfall. Russia is increased based on the latest data from Rosstat. Ukraine is raised based on updated harvest information. South Africa is reduced mostly reflecting lower area. Mexico is cut as lower winter corn yield expectations are partially offset by higher summer corn area. Foreign barley production is raised, with an increase for Australia partly offset by a decline for Argentina.

Major global trade changes for 2024/25 include reduced corn exports for Brazil and South Africa. For 2023/24, Brazil's exports for the marketing year ending February 2025 are lowered based on observed shipments to date. More than offsetting is an increase for Argentina. Corn imports for 2024/25 are cut for China and Taiwan but raised for Turkey, Vietnam, Colombia, and Egypt. Barley exports are raised for Australia, Russia, and Turkey but lowered for Argentina. Barley imports are raised for Iran and Iraq. Foreign corn ending stocks are lowered, mostly reflecting declines for China and Argentina that are partly offset by increases for Russia and India. Global corn ending stocks, at 288.9 million tons, are down 1.4 million.

RICE: The outlook for 2024/25 U.S. rice this month is for slightly higher supplies, larger exports, and unchanged domestic use and ending stocks. Total supplies are increased, all on higher imports. All rice imports are raised 1.0 million cwt, to a record 48.0 million, with all of the increase in long-grain on the strong pace of Thai jasmine and Indian basmati rice imports to date. All rice exports are raised 1.0 million cwt to 97.0 million, with all of the increase in medium- and short-grain rice on a continued strong pace of sales and shipments, mostly to Northeast Asia. Projected ending stocks are unchanged at 47.0 million cwt and remain the highest since 2014/15. The season-average farm price for all rice is raised \$0.20 per cwt to \$15.60 on higher-than-expected prices for the month of January for both classes of rice reported in the February NASS *Agricultural Prices*.

The 2024/25 global outlook this month is minimally changed. Global production is virtually unchanged and supplies are raised only fractionally on a small increase in beginning stocks. Global consumption is 0.2 million tons higher at 530.7 million, on increases for Bangladesh and Nepal. With minor revisions to global exports, ending stocks are reduced only slightly, down 0.1 million tons to 181.5 million.

OILSEEDS: U.S. 2024/25 soybean supply and use projections are unchanged this month. The soybean oil balance sheet includes higher exports and lower soybean oil used for biofuel. The season-average soybean price is projected at \$9.95 per bushel, down 15 cents from last month. Soybean meal and oil prices are unchanged at \$310 per short ton and 43 cents per pound, respectively.

Global 2024/25 soybean supply and use forecasts include nearly unchanged production, higher crush, and lower ending stocks. Higher production for Ukraine, Mexico, and Australia is offset by lower production for South Africa. Soybean crush is raised 2.9 million tons to 352.8 million, mainly on higher crush for China, Argentina, Thailand, Ukraine, and Pakistan. Soybean crush for China is raised 2 million tons to 105 million based on pace to date. Global soybean exports are nearly unchanged as higher shipments for Canada are offset by lower exports for South Africa. Global ending stocks are reduced 2.9 million tons to 121.4 million mainly on lower stocks for China and Argentina.

Also to note, 2024/25 global production of high-oil content seeds (rapeseed and sunflowerseed) is raised 1 percent this month but still 5 percent lower than 2023/24. Sunflowerseed production is raised for Russia and Ukraine and rapeseed production is raised for Australia and Ukraine.

SUGAR: U.S. sugar supply for 2024/25 is decreased by 75,701 short tons, raw value (STRV) to 14.317 million on decreases in imports more than offsetting an increase in sugar production. Based on processor reporting in the Sweetener Market Data (SMD), cane sugar production in Louisiana is increased by 28,679 STRV to 2.049 million on greater production in January than projected last month. Cane sugar production in Florida is reduced 26,763 STRV to 1.971 million on processors' reporting of a lower sugarcane yield. Beet sugar production is increased 35,980 STRV on an increase in sucrose recovery from sliced beets more than offsetting a small increase in beet pile shrink and slightly lower sugar from desugared molasses. The increase in recovery is due to resolution of certain factory problems limiting earlier season production in the Pacific Northwest. Sugarbeets remaining to be processed are high in sucrose content and high in juice purity and are storing well. Slicing is expected to extend into May to compensate for earlier difficulties in processing plants. Processors in the Red River Valley are confident of beet storage conditions being manageable through the rest of the season. Any production problems in Michigan were recognized early on by the processor and incorporated into earlier sugar *WASDEs*. Sugar imports are decreased 113,597 STRV mostly on lower imports from Mexico. In March, the Department of Commerce (DOC) sets the final Mexico export limit at the higher of two amounts; namely, U.S. Sugar Needs calculated from the March *WASDE* as defined in the CVD Suspension Agreement or an Export Limit previously established by DOC. The Export Limit set by DOC from December *WASDE* is determined to be higher than the U.S. Needs in this month's *WASDE*. Partially offsetting is an increase in high-tier tariffs imports of 10,588 STRV on actual entries exceeding last month's projection.

Deliveries for human consumption are reduced by 35,000 STRV to 12.240 million on lower recent period deliveries than originally projected. The net effect on ending stocks is a decrease of 40,701 STRV to 1.872 million for an ending stocks-to-use ratio of 15.04 percent.

Mexico sugar production for 2024/25 is unchanged from last month at 4.859 million metric tons (MT). Based on FAS Mexico City reporting, imports are increased to 189,000 MT and deliveries for consumption are lowered to 4.198 million MT. Ending stocks are decreased slightly and exports are residually projected at 957,021 MT, an increase of

100,095 over last month. Exports under license to the United States are reduced 106,282 MT to 425,127 while exports to other destinations are increased 206,377 MT to 531,894.

LIVESTOCK, POULTRY, AND DAIRY: Historical red meat, poultry, and egg supply and use estimates are adjusted to reflect revisions in slaughter, inventory, cold storage, and production data.

Total red meat and poultry production for 2025 is raised on higher beef and chicken production forecasts, which is partially offset by lower pork and turkey production forecasts. The higher beef production forecast is due to heavier dressed weights more than offsetting lower slaughter. Pork production is lowered on a slower rate of slaughter in the first quarter, partially offset by heavier dressed weights. USDA will release the *Quarterly Hogs and Pigs* report on March 27, providing a further indication of hog supplies for slaughter in the second half of the year. Broiler production is raised on improved returns and the latest placement and hatchery data. Turkey production is lowered on the latest hatchery data. Egg production is lowered due to Highly Pathogenic Avian Influenza (HPAI)-related culling of the egg laying flock through early March that is expected to affect production through the first three quarters of 2025.

The beef export forecast for 2025 is raised, with increased production allowing for additional supplies in the second half of the year. Beef imports are raised on strong shipments during January and continued strong demand for lean processing beef. Pork exports are reduced on lower expected domestic supplies and increased global price competition. Broiler exports are reduced on the latest trade data and continued price competition from global exporters dampening U.S. shipments. Turkey exports are lowered on the lower expected domestic supplies.

Cattle price forecasts are lowered for the first half of 2025 based on recent prices. The second half is unchanged as demand for cattle is expected to remain strong. Hog price forecasts are lowered for the second and third quarters, based on recent prices and slightly weaker demand than previously expected. The broiler price forecast is lowered based on lower expected prices during the first half of the year. The 2025 turkey price is lowered on recent prices and weaker demand. Egg price forecasts are reduced on latest prices showing a downward turn, as market demand slows after several weeks of increasing prices in response to HPAI-related reductions in production.

The milk production forecast for 2025 is reduced on lower expected output per cow more than offsetting slightly higher cow inventories. Imports are unchanged on a fat basis and reduced on a skim-solids basis. Exports are lowered on a fat basis, primarily due to lower cheese exports. On a skim-solids basis, exports are lowered due to lower expected shipments of cheese, dry skim milk products, and lactose. Domestic use is increased on both a fat and skim-solids basis.

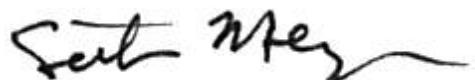

Cheese, butter, nonfat dry milk (NDM), and whey price forecasts are all lowered on recent prices. The Class III price is lowered on the lower price expectations for cheese and whey. The Class IV price is also reduced due to lower butter and NDM prices. The all milk price estimate for 2025 is lowered to \$21.60 per cwt.

COTTON: There are no changes to this month's 2024/25 U.S. cotton balance sheet. The 2024/25 season average upland farm price projection is reduced to 63 cents per pound.

For the 2024/25 world cotton balance sheet, production, consumption, and trade are increased while ending stocks are reduced this month. Beginning stocks are unchanged. Higher production for China more than offsets reductions for Pakistan and Argentina. Consumption is raised for Pakistan, Bangladesh and Egypt, more than offsetting small changes elsewhere. Exports by Brazil and Turkey are increased, exceeding reductions for Australia and Egypt. Imports by China are lowered but are more than offset by increases for Pakistan, Bangladesh and Egypt. Ending stocks for 2024/25 are lowered 80,000 bales.

Approved by the Secretary of Agriculture and by the Chairman of the World Agricultural Outlook Board, Mark Jekanowski, (202) 720-6030. This report was prepared by the Interagency Commodity Estimates Committees.

California 10/	40.90	22.30	22.50	22.50
Other States 1/	18.20	17.20	14.80	15.20

Note: Totals may not add due to rounding. 1/ Marketing year beginning August 1. 2/ Includes the following quantities of broken kernel rice (type undetermined) not included in estimates of ending stocks by type (in mil. cwt): 2020/21-2.5; 2021/22-2.0; 22/23- 2.3. 3/ Residual includes unreported use, processing losses, and estimating errors. Use by type may not add to total rice use because of the difference in brokenness between beginning and ending stocks. 4/ Includes rough rice and milled rice exports. Milled rice exports are converted to an equivalent rough basis. 5/ Expressed as a percent, i.e., the total quantity of whole kernel and broken rice produced divided by the quantity of rough rice milled. 6/ Marketing-year weighted average price received by farmers. 7/ Includes imports. 8/ Exports by type of rice are estimated. 9/ The California medium/short-grain season-average- farm price (SAFP) largely reflects rice that is marketed through price pools in California. The pool price is not final until all the rice in the pool is marketed for the crop year. Therefore, SAFP forecasts based on the average of NASS monthly prices and the final price may differ. 10/ Marketing year beginning October 1.

U.S. Dairy Prices

	2022	2023	2024 Est. Feb	2024 Est. Mar	2025 Proj. Feb	2025 Proj. Mar
Product Prices 1/						
Cheese	2.1122	1.7593	1.8634	1.8634	1.880	1.810
Butter	2.8665	2.6170	2.8870	2.8870	2.645	2.515
Nonfat Dry Milk	1.6851	1.1856	1.2420	1.2420	1.295	1.255
Dry Whey	0.6057	0.3618	0.4913	0.4913	0.605	0.525
<i>Dollars Per Pound</i>						
Milk Prices 2/						
Class III	21.96	17.02	18.89	18.89	19.10	17.95
Class IV	24.47	19.12	20.75	20.75	19.70	18.80
All Milk 3/	25.34	20.34	22.61	22.61	22.60	21.60
<i>Dollars Per Cwt</i>						

All prices are January-December averages. 1/ Simple average of monthly prices calculated by AMS from weekly average dairy product prices for class price computations. 2/ Annual Class III and Class IV prices are the simple averages of monthly minimum Federal order milk prices paid by regulated plants for milk used in the respective classes. All milk price is the simple average of monthly prices received by farmers for milk at average test. 3/ Does not reflect any deductions from producers as authorized by legislation.

Reliability of March Projections 1/

Note: Tables on pages 35-37 present a record of the March projection and the final Estimate. Using world wheat production as an example, the "root mean square error" means that chances are 2 out of 3 that the current forecast will not be above or below the final estimate by more than 0.5 percent. Chances are 9 out of 10 (90% confidence level) that the difference will not exceed 0.9 percent. The average difference between the March projection and the final estimate is 2.4 million tons, ranging from 0 million to 8 million tons. The March projection has been below the estimate 32 times and above 11 times.

1/ See pages 35 and 36 for record of reliability for U.S. wheat, rice, soybeans, and cotton. Marketing years 1981/82 through 2023/24 for grains, soybeans, and cotton. Final for grains, soybeans, and cotton is defined as the first November estimate following the marketing year for 1981/82 through 2023/24. Calendar years 1982 through 2023 for meats, eggs, and milk. Final for animal products is defined as the latest annual production estimate published by NASS for 1982-2023.

Related USDA Reports

The *WASDE* report incorporates information from a number of statistical reports published by USDA and other government agencies. In turn, the *WASDE* report provides a framework for more detailed reports issued by USDA's Economic Research Service and Foreign Agricultural Service. For more information on how the *WASDE* report is prepared, go to: <http://www.usda.gov/oce/commodity/wasde>.

Supply and Demand Database

The Foreign Agricultural Service publishes Production, Supply, and Demand Online, a comprehensive database of supply and demand balances by commodity for 190 countries and regions at <https://apps.fas.usda.gov/psdonline/app/index.html>. Data for grains, oilseeds, and cotton are updated monthly and data for other commodities are updated less frequently.

Foreign Production Assessments

Preliminary foreign production assessments and satellite imagery analysis used to prepare the *WASDE* report are provided by the International Production Assessment Division (IPAD) of the Foreign Agricultural Service. IPAD is located at <https://ipad.fas.usda.gov/>.

Metric Conversion Factors

1 Hectare = 2.4710 Acres

1 Kilogram = 2.20462 Pounds

Metric-Ton Equivalent	= Domestic Unit	Factor
Wheat & Soybeans	bushels	.027216
Rice	cwt	.045359
Corn, Sorghum, & Rye	bushels	.025401
Barley	bushels	.021772
Oats	bushels	.014515
Sugar	short tons	.907185
Cotton	480-lb bales	.217720

World Agricultural Supply and Demand Estimates

WASDE-658 – March 11, 2025

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, gender, religion, age, disability, political beliefs, sexual orientation, and marital or family status. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at 202-720-2600 (voice and TDD).

To file a complaint of discrimination, write USDA, Director, Office of Civil Rights, Room 326-W, Whitten Building, 1400 Independence Avenue, SW, Washington, D.C. 20250-9410 or call (202) 720-5964 (voice or TDD). USDA is an equal opportunity provider and employer.
