

JAMES RICHARDSON

Co-Director of the Agricultural and Food Policy Center, Texas A&M AgriLife Senior Faculty Fellow, and Regents Professor in the Department of Agricultural Economics at Texas A&M University. James received his Ph.D. in agricultural economics at Oklahoma State University in 1978 and joined the Texas A&M Department of Agricultural Economics where he teaches risk analysis and conducts research on farm policy, risk analysis, and the economic feasibility of alternative feedstocks for renewable fuels. He is best known for his farm level policy analysis research that is used by Congress to compare the impacts of alternative farm program options.
