Agriculture

- Yellow numbers are percentages, representing the average annual contribution of each region to the total national inventory. Regions not numbered contribute less than 1% to the national total.
- Major livestock areas combined account for approximately 70% of the total national inventory annually.
- Major and minor livestock areas combined account for approximately 99% of the total national inventory annually.

Source: Major and minor agricultural areas and regional percentages are derived from 2010-12 Agricultural Production Statistics, obtained from Statistics New Zealand.
