INCENTIVES**

## Climate-Smart Agriculture Innovative Finance Initiative

Using innovative finance mechanisms to accelerate climate-smart practice uptake by farmers, including Tribal and Black farmers, leveraging private sector demand to strengthen markets for climate-smart commodities.

**Funding Ceiling: \$70 Million**

**Partnerships for Climate-Smart Commodities**

A man and a woman are standing in a vast, green agricultural field under a dramatic, sunset-colored sky. The man, wearing a cap and a plaid shirt, is holding a small plant or seedling, and the woman, also in a plaid shirt, is looking at it. The field is filled with rows of young plants, and the horizon is visible in the distance with some faint structures. The overall mood is one of hope and collaboration in agriculture.

**IT WILL TAKE COLLECTIVE ACTION TO TACKLE THE  
MOST PRESSING CHALLENGES FACING AGRICULTURE,  
society and the planet**
