

Rob Griesbach earned a Ph.D. in genetics from Michigan State University in 1980. The following year, he joined USDA's Agricultural Research Service (USDA-ARS). For about 25 years, Rob conducted a broad-based research program in plant genetics. Currently, Rob is the Deputy Assistant Administrator for Technology Transfer. In this role, Rob coordinates programs to optimize the transfer of research results across USDA-ARS to the private sector and other users. He provides leadership in the policies and procedures related to the management of intellectual property, patenting and licensing.
