California
The potential to grow and make innovative products in rural America is limitless. Since 2009, the Obama Administration has made targeted investments to help rural businesses grow. Through the U.S. Department of Agriculture’s projects in affordable housing, energy efficiency, roads and bridges, and internet access, coupled with loans and grants for rural businesses, the Administration has helped to attract and retain a talented rural labor force, improve connectivity and access to information, move products to market, and make rural communities competitive—ultimately supporting strong local economies and expanded opportunity for rural Californians.

SPOTLIGHT ON LOCAL
In far northern California, the Hoopa Valley Tribe secured a USDA grant to purchase a truck to deliver healthy food, including that grown by local producers, to over 1,200 Native American and low-income people in 13 rural counties. A second grant allowed the tribe to purchase an additional refrigerated truck.

Local food sales were valued at $11.7 billion in 2014. In California, USDA has invested in 827 local food projects, helping to develop food hubs, small-scale processing, farmers markets and other market opportunities in local food.

SUPPORT FOR RURAL BUSINESSES
USDA has made investments to help 411 rural businesses in California thrive and grow.

USDA investments in everything from advanced biofuels manufacturing facilities to food hubs help businesses, many of them small, capitalize on emerging markets for rural-made products. In rural America, small businesses support one in three jobs.

RENEWING RURAL MANUFACTURING
The rural economy includes more than products that come from farms. Rural manufacturing supports 18,075 jobs in California. USDA has invested $85.9 million to help rural manufacturers in California increase production and capacity.

GROWING EXPORTS
In 2013, exports of farm and ranch products alone contributed $20.1 billion to California’s economy. The President’s Made In Rural America initiative helps rural businesses capitalize on demand for American-made products and identify ways they can participate in global markets.

HOUSING
Access to safe, affordable housing is critical to maintaining the rural labor force. USDA has helped 27,937 California families purchase or repair homes.

CONNECTIVITY
USDA has invested $46.2 million in telecommunications projects serving rural Californians, which has helped to expand access to state-of-the-art health care, educational, and cultural resources and helps rural businesses compete in the global economy.

WATER
USDA has invested $407.6 million to support efficient water supply, treatment and storage facilities, and wastewater treatment systems. That investment has improved the health of thousands of rural Californians who now have access to clean water and reliable sanitation.
