New Jersey

The potential to grow and make innovative products in rural America is limitless. Since 2009, the Obama Administration has made targeted investments to help rural businesses grow. Through the U.S. Department of Agriculture’s projects in affordable housing, energy efficiency, roads and bridges, and internet access, coupled with loans and grants for rural businesses, the Administration has helped to attract and retain a talented rural labor force, improve connectivity and access to information, move products to market, and make rural communities competitive—ultimately supporting strong local economies and expanded opportunity for rural New Jersey families.

SUPPORT FOR RURAL BUSINESSES
USDA has made investments to help 85 rural businesses in New Jersey thrive and grow.

USDA investments in everything from advanced biofuels manufacturing facilities to food hubs help businesses, many of them small, capitalize on emerging markets for rural-made products. In rural America, small businesses support one in three jobs.

RENEWING RURAL MANUFACTURING
The rural economy includes more than products that come from farms. USDA has invested $2.1 million to help rural manufacturers in New Jersey increase production and capacity.

GROWING EXPORTS
In 2013, exports of farm and ranch products alone contributed $566.4 million to New Jersey’s economy. The President’s Made In Rural America initiative helps rural businesses capitalize on demand for American-made products and identify ways they can participate in global markets.

HOUSING
Access to safe, affordable housing is critical to maintaining the rural labor force. USDA has helped 7,160 New Jersey families purchase or repair homes.

WATER
USDA has invested $119.9 million to support efficient water supply, treatment and storage facilities, and wastewater treatment systems. That investment has improved the health of thousands of rural New Jersey families who now have access to clean water and reliable sanitation.

SPOTLIGHT ON LOCAL
Camden City Garden Club received USDA funding to train and support 30 community gardeners and 21 youth to become urban farmers and agribusiness entrepreneurs.

Local food sales were valued at $11.7 billion in 2014. In New Jersey, USDA has invested in 250 local food projects, helping to develop food hubs, small-scale processing, farmers markets and other market opportunities in local food.
