

## **Seanicaa E. Herron**

Seanicaa E. Herron currently serves as an agricultural economist at the World Agricultural Outlook Board (WAOB) within the Office of the Chief Economist (OCE). Mrs. Herron's primary responsibilities at the World Agricultural Outlook Board include conducting economic analysis relating to supply, use, and price forecasts for livestock, dairy and poultry products which are published in the monthly World Agricultural Supply and Demand Estimates (WASDE) report. Prior to joining the World Agricultural Outlook Board, Mrs. Herron was employed as an economist at USDA's Economic Research Service (ERS) focusing primarily on the U.S. cattle and beef industry. Before entering government service in 2015, Mrs. Herron worked 8 years in the private sector. She was formerly employed by Informa Economics, Doane Agricultural Advisory Services, and Pfizer Animal Genetics. Mrs. Herron also worked in academia as an extension economist at University of Missouri's Commercial Agriculture Program. Mrs. Herron received her bachelor's degree in Agribusiness and master's degree in Agricultural Economics, both from Mississippi State University.
