

Tiffany Lee

Tiffany Lee is a Director of Regulatory and Scientific Affairs for the North American Meat Institute, where she provides informed scientific analysis to its members on many issues, including food safety, food processing, food quality, diet and health, nutrition, public health initiatives, biotechnology, new technologies, research priorities, and animal health and welfare.

Dr. Lee earned her Master of Science degree in 2012, with a focus on ruminant nutrition and physiology. She also earned her Doctor of Veterinary Medicine degree from Kansas State University in 2012. After practicing in a mixed animal clinic in Limon, Colorado, she returned to Kansas State University to pursue a PhD degree in Pathobiology, where her dissertation focused upon beef cattle health and welfare.
