Purpose of Document

USDA DM 3515-002 states: “Agencies are responsible for initiating the PIA in the early stages of the development of a system and to ensure that the PIA is completed as part of the required System Life Cycle (SLC) reviews…” and “New systems, systems under development, or systems undergoing major modifications are required to complete a PIA.”

This document is being completed in accordance with NIST SP 800-37 Rev 1 which states, “The security plan also contains as supporting appendices or as references to appropriate sources, other risk and security-related documents such as a risk assessment, privacy impact assessment, system interconnection agreements, contingency plan, security configurations, configuration management plan, incident response plan, and continuous monitoring strategy.”

Abstract

**Name of the component and system:** Farm Loan Delivery and Credit Analysis System (FLD CAS)

**Brief description of the system and its function:** Farm Loan Delivery and Credit Analysis System (FLD CAS) is comprised of multiple web-based applications that provide field office staff the ability to process and service loan applications and allows producers access to their Farm Loan Program (FLP) account information.

**Why the PIA is being conducted:** To support federal law, regulations and policies.

Overview

- **System Name**: Farm Loan Delivery and Credit Analysis System (FLD CAS)

- **System Description**: Farm Loan Delivery and Credit Analysis System (FLD CAS) is comprised of multiple web-based applications that provide field office staff the ability to process and service loan applications and allows producers access to their Farm Loan Program (FLP) account information.

<table>
<thead>
<tr>
<th>Applications</th>
<th>Overview</th>
</tr>
</thead>
<tbody>
<tr>
<td>Direct Loan System (DLS)</td>
<td>DLS resides on Midrange Systems and is a web-based application that provides field offices with the ability to process loan applications using the Loan Making application, service loans using the Loan Servicing application, and allow producers access to their Farm Loan Program (FLP) account information.</td>
</tr>
<tr>
<td>Electronic Debt &amp; Loan Restructuring System (eDALR$)</td>
<td>Electronic Debt and Loan Restructuring System (eDALR$) resides on Midrange Systems and is an intranet web-based program developed to assist authorized agency officials in determining and evaluating the effects of primary loan servicing in accordance with FSA Handbook 5-FLP. The eDALR$ system completes a series of complex mathematical calculations based on information regarding the borrower's cash flow and loan status. This information is used in attempting to restructure the borrower's debt and maximize their repayment ability, while avoiding or minimizing loss to the Government. Web enabled version of eDALR$ performs debt and loan restructuring analysis on distressed borrowers or delinquent government loans and went into production in April 2008.</td>
</tr>
<tr>
<td>Farm Business Plan (Web Equity Manager) (FBP)</td>
<td>Farm Business Plan (FBP) resides on Midrange Systems and is a web-based application used by USDA Field Service Centers to assist borrowers with obtaining Farm Loans and improving their farming business. The FBP application provides web-based automated business processes that perform farm planning and analysis, loan origination and servicing functions, and manages the FLP loan portfolio. A completed FBP provides the business’s financial condition, operating plans, and actual summary for a specified time as well as interaction with the Loan Making, Loan Servicing, FLPRA and eDALR$ applications to ensure that loan requests have approved Farm Business Plans and to provide those applications with business data.</td>

Section 1.0 Characterization of the Information

The following questions are intended to define the scope of the information requested and/or collected as well as reasons for its collection as part of the program, system, rule or technology being developed.

1.1 What information is collected, used, disseminated or maintained in the system?

<table>
<thead>
<tr>
<th>Applications</th>
<th>Information is collected, used, disseminated or maintained in the system.</th>
</tr>
</thead>
<tbody>
<tr>
<td>DLS</td>
<td>Name, street address, personal identification number (TIN/SSN), user ID, ethnicity, race, gender and case number.</td>
</tr>
<tr>
<td>eDALR$</td>
<td>Name, personal identification number (SSN) and Agency assigned number.</td>
</tr>
<tr>
<td>FBP</td>
<td>Name, date of birth, street address, personal identification number (SSN/TIN), financial data (credit card number, loan number, credit Reports) and employment history.</td>
</tr>
</tbody>
</table>

1.2 What are the sources of the information in the system?

<table>
<thead>
<tr>
<th>Applications</th>
<th>Sources of information in the system.</th>
</tr>
</thead>
</table>
| DLS          | 1. Other FSA Applications: Service Center Information Management System (SCIMS), Farm Business Plan (FBP), Electronic Loan Deficiency Payments, Master Reference Tables (MRT), Appraisal System COTS (Appraisal), Program Loan Accounting System (PLAS) and Automated Discrepancy Processing System (ADPS).  
2. The other sources listed below do not have a direct connect to/from the application. Information is obtained through files etc.  
- State and Local Agencies: County offices, Tax records, Courthouse Records (UCC filings) and Deed Recorder.  
- Other Sources: Other lenders, credit reporting agencies, private appraisers, Crop insurance companies, multi list data, Farm Credit System, sales data, Ag Lenders, and business owners. |
| eDALR$       | The Farm Service Agency/Customers/Borrowers. |
| FBP          | Farm Service Agency SCIMS application and Microbilt. |

1.3 Why is the information being collected, used, disseminated or maintained?

<table>
<thead>
<tr>
<th>Applications</th>
<th>Why information being collected, used, disseminated or maintained.</th>
</tr>
</thead>
<tbody>
<tr>
<td>DLS</td>
<td>The collected information will be used to service existing loans, answer farm loan borrowers’ inquiries and provide data on servicing of loans to manage the program.</td>
</tr>
<tr>
<td>eDALR$</td>
<td>To assist field office employees in restructuring customer debt from loans originating from the USDA farm loan programs.</td>
</tr>
<tr>
<td>FBP</td>
<td>To better assess each producer’s financial situation and their goals for the future. The resulting formal business plan, outlining the details of the producer, is required to begin their loan eligibility decisions and processing.</td>
</tr>
</tbody>
</table>

1.4 How is the information collected?

<table>
<thead>
<tr>
<th>Applications</th>
<th>How information collected.</th>
</tr>

The information is collected directly from farm loan borrower and information is received from other FSA applications, state and local agencies and other third party financial sources. See question 1.2 above.

Manual system input from FSA Field Agent.

Data collected from the borrower at the county office and entered by the county office staff.

1.5 How will the information be checked for accuracy?

<table>
<thead>
<tr>
<th>Applications</th>
<th>How information is checked for accuracy.</th>
</tr>
</thead>
<tbody>
<tr>
<td>DLS, eDALR$, FBP</td>
<td>Data collected from the customer is required by policy to be reviewed for accuracy, relevancy, timeliness, and completeness upon initial entry into the system and then again when any required updates are made.</td>
</tr>
</tbody>
</table>

1.6 What specific legal authorities, arrangements and/or agreements defined the collection of information?

<table>
<thead>
<tr>
<th>Applications</th>
<th>Legal authority to collect information.</th>
</tr>
</thead>
</table>
1.7 **Privacy Impact Analysis:** Given the amount and type of data collected, discuss the privacy risks identified and how they were mitigated.

</tbody>
</table>
Access to computerized files are protected by access control software, physical access controls and if warranted, password-protected.

SORN USDA/FSA-2 States: Program documents are destroyed within 6 years after end of participation. However, FSA is under a records freeze.

According to Records Management DR3080-001 Disposition of Inactive Records: Records and other documents that are no longer sufficiently active to warrant retention in office space shall be removed as rapidly as possible by: (a) transfer to a Federal Records Center, or (b) transfer to a records retention facility meeting the requirements of 36 CFR Chapter 12, Subchapter B Records Management, Subpart K, 1228.224 through 1228.244, or (c) if authorized, by disposal. (See Appendix B – Records Disposition Procedures.)
Section 4.0 Internal Sharing and Disclosure

The following questions are intended to define the scope of sharing within the United States Department of Agriculture.

4.1 With which internal organization(s) is the information shared, what information is shared and for what purpose?
