ReConnect Program: Frequently Asked Questions

Round 5 Notice of Funding Opportunity (NOFO)

Updated: March 26, 2024

General Application Inquiries

Question: What is the ReConnect Program?

Answer: The ReConnect Program offers federal loans, grants, and loan-grant combinations to help get broadband to rural areas that lack sufficient broadband access (defined as 25 megabits per second (Mbps) downstream, and 3 Mbps upstream). ReConnect loans and grants can help cover costs associated with the construction, improvement, or acquisition of facilities and equipment.

Question: What types of assistance are available in the ReConnect program?

Answer: USDA offers loans and grants to build infrastructure and install equipment that provides modern, reliable, high-speed internet service in rural places. The ReConnect program offers five products:

- 100 percent loans
- 50-50 loan-grant combinations
- 100 percent grants
- 100 percent grants for Alaska Native Corporations, Tribal Governments, Colonias, Persistent Poverty Areas and Socially Vulnerable Communities

Question: How does the February 21, 2024 ReConnect NOFO define “sufficient access to broadband”?

Answer: “Sufficient access to broadband” is defined as any rural area in which premises have fixed, terrestrial broadband service defined as 25 megabits per second (Mbps) downstream and 3 Mbps upstream. Premises, as defined in the ReConnect Regulations, means households, farms, and businesses.
Question: What are the buildout speeds required for facilities proposed to be constructed with ReConnect funds?

Answer: Proposed facilities funded by ReConnect must be capable of delivering 100 Mbps symmetrical service to every premises in the Proposed Funded Service Area (PFSA) at the same time. Specifically, this means every premises within the PFSA can receive 100 Mbps downstream and 100 Mbps upstream service at the same time.

Question: What types of – and how much – ReConnect funding is provided under the February 21, 2024 ReConnect NOFO?

Answer: There are four funding categories available in the February 21, 2024 ReConnect NOFO:

- 100 Percent Loan. A total of up to $200 million is available for loans. The maximum amount that can be requested in an application is $50 million.
- 50 Percent Loan – 50 Percent Grant Combination. Up to $200 million is available for loan-grant combinations. The maximum amount that can be requested in an application is $25 million for the loan, and $25 million for the grant. Loan and grant amounts will always be equal.
- 100 Percent Grant. Up to $150 million is available for grants. The maximum amount of grant funds that can be requested in an application is $25 million.
- 100 Percent Grant for Alaska Native Corporations, Tribal Governments, Colonias, Persistent Poverty Areas or Socially-Vulnerable Communities. Up to $150 million is available for grants. The maximum amount of grant funds that can be requested in an application is $25 million.

Note, the minimum amount that can be requested in any funding category is $100,000.

Question: What are the interest rates for loans allowed under the February 21, 2024 ReConnect NOFO?

Answer: The interest rate for 100 percent loans is fixed at 2 percent. The interest rate for the loan portion of loan-grant combinations is set at the U.S. Treasury rate for the remaining amortization period at the time of each advance of funds.

Question: What are the deferral periods for loans allowed under the February 21, 2024 ReConnect NOFO?
Answer: The deferral period for loans will be three years deferral of principal and interest. The deferral period begins on the date of the first advance of loan funds.

Question: How does the advance of funds process work under the ReConnect Program?

Answer: For this funding opportunity, the advance of funds for a 50/50 loan grant combination will be as follows: a) funds substituted for the loan component will be advanced first, b) loan funds will be advanced second and c) grant funds will be advanced third.

The advance of funds for 100 percent grants that require a matching component will be prorated against the amount of matching funds that are required and the amount of the grant funds approved.

Question: Which ReConnect funding categories do not require a match?

Answer: Currently, a match is not required for applications submitted under the 100 Percent Grant for Alaska Native Corporations, Tribal Governments, Colonias, Persistent Poverty Areas and Socially Vulnerable Communities.

Question: What is the amortization period on which loan repayments (principal and interest) are based?

Answer: Unless the applicant requests a shorter repayment period, loans must be repaid with interest within a period that – rounded to the nearest whole year – is equal to the expected Composite Economic Life of the funded assets. This is determined by RUS using acceptable depreciation rates, plus three years. You can find the current acceptable depreciation rates table at this link: https://go.usa.gov/xexHF.

“Composite Economic Life” means the weighted (by dollar amount of each class of facility) average economic life of all classes of facilities necessary to complete construction of the broadband facilities in the proposed funded service area.

Question: How does an applicant determine what an affordable rate is for the Proposed Funded Service Area (PFSA)?

Answer: Review the median household income for the PFSA, identify any potential competition in the PFSA – including what rates they are proposing – and also review Federal Communications Commission (FCC) Urban Rate Survey Data and Resources (available at this link: https://go.usa.gov/xe35x). Use this
information to demonstrate the affordability of your application's proposed rate packages. You also are free to provide additional supporting information on the low-cost option you propose.

**Question:** Are pole attachment fees eligible costs under the ReConnect Program?

**Answer:** Yes, pole attachment fees associated with the construction of the project throughout the five-year construction period are eligible costs. In addition, if the pole owner requires that a pole be replaced to support the broadband facilities, such costs shall be eligible under the current NOFO.

**Question:** How many applications can one entity submit for consideration under the February 21, 2024 ReConnect NOFO?

**Answer:** An entity can only submit one application for consideration. Although the application system will allow you to create more than one application in the system, only one application can be submitted for consideration.

**Question:** Must applicants for the 100 percent Grant for Alaska Native Corporations, Tribal Governments, Colonias, Persistent Poverty Areas or Socially Vulnerable Communities propose to serve all of these at the same time?

**Answer:** No. An Alaskan Native Corporation (ANC), Tribal Government, or a corporation wholly owned by a Tribal Government proposing to provide service on its own lands is eligible to apply under this funding category. Additionally, this funding category is available to any applicant proposing projects where 75 of the applicant's Proposed Funded Service Areas are located in areas recognized as Colonia as of October 1, 1989. Finally, this funding category is available to any applicant proposing to serve a geographic area that consists of at least 75 percent Persistent Poverty Areas or Socially Vulnerable Communities.

**Question:** We submitted a Tribal Resolution in the application associated with a previous round of funding. Do we need a new resolution for the current round of funding?

**Answer:** Yes, a new up-to-date Tribal resolution should be provided in a new ReConnect application.

**Question:** Can a non-Tribal applicant that is proposing a project impacting Tribal lands submit their Tribal resolution after the application is submitted?

**Answer:** No, a Tribal resolution must be included in the application submitted by a non-Tribal applicant at the time of submission if the proposed project impacts Tribal lands. Failure to include the resolution at
time of submission makes your application ineligible for consideration. Tribal applicants are not affected by this requirement. [https://www.usda.gov/reconnect](https://www.usda.gov/reconnect)

**Question:** When can I apply through the online application system?

**Answer:** The RUS online application system will open March 22, 2024 and remain open until 11:59 a.m. Eastern on May 21, 2024. Applicants can access the application system at [https://www.usda.gov/ReConnect](https://www.usda.gov/ReConnect).

**Question:** What is a Unique Entity Identifier (UEI) and where do we get it?

**Answer:** On April 4, 2022, the unique entity identifier used across the federal government changed from the DUNS Number to the UEI. The UEI is a 12-character alphanumeric ID assigned to an entity by SAM.gov.

**Question:** Can an applicant start an application if they do not have their System for Award Management (SAM) registration, or Unique Entity Identifier (UEI) yet?

**Answer:** No. Both UEI and a Taxpayer Identification Number (TIN) are required to start a ReConnect application.

It can take up to three weeks to register in the System for Award Management (SAM), get a UEI and a Commercial and Government Entity (CAGE) Code (if one is required for your organization). Information is available at this link: [https://sam.gov/content/home](https://sam.gov/content/home) It is important to start these items as soon as possible.

Please keep in mind that entities creating new registrations in SAM and entities completing their annual registration renewals must review and complete financial assistance representations and certifications before their registration can be activated. All SAM registration certifications must be up-to-date and complete.

**Question:** What credentials do I need to access the Application Intake system?

**Answer:** USDA, in partnership with Login.gov, is upgrading its processes for user verification and access to customer-facing USDA systems including those developed and maintained by the RUS Telecommunications Program.
As of March 2024, you may access these systems – including ReConnect Application Intake, Community Connect, and Reporting and Compliance – using two different credentials depending on when you first registered for access. The two credentials are Level 2 eAuthentication (eAuth) and Login.gov, respectively.

Important Registration Information

- For those who first registered prior to September 11, 2023, users may login to RUS/Telecom systems using either their eAuth ID and password (if they have one) OR their Login.gov ID/password. This will change in October 2024.
- For those who first registered after September 11, 2023, users may login using only their Login.gov ID/password.
- Starting October 1, 2024, ALL users regardless of registration date must login using Login.gov credentials only. eAuth IDs will no longer be supported

For more information please visit the Login.gov & USDA eAuthentication User Aid available at https://www.rd.usda.gov/media/file/download/usda-rd-loginuseraid.pdf

Question: What types of IDs do we need to access the ReConnect Application System?

Answer: To access the application system, applicants need a USDA-verified (Level II) eAuthentication (eAuth) account, which can be obtained at www.eauth.usda.gov. All users working on an application must have their own Level II eAuth ID.

To create and submit an application – as well as manage users in the application system – you must also have an approved Authorized Representative Request (ARR). Instructions on how to submit a new ARR or how to update an existing ARR are in the System User Manuel and will be made available before the application window opens at https://www.usda.gov/ReConnect under “Forms and Resources”. Additionally, short “How-To” videos explaining the ARR process can be found on the ReConnect website under “Application Workshop and Webinar Materials”.

Note: An ARR requires a Taxpayer Identification Number (TIN), for which you can apply through the Internal Revenue Service website at this link: https://go.usa.gov/xMJnr, and a Unique Entity Identifier which can be obtained by visiting https://sam.gov/content/home.
Question: We have an approved Authorized Representative Request (ARR) from a previous round of the ReConnect Program. Do we need to submit a new ARR?

Answer: If your entity has an approved ARR from the first or second round of the ReConnect Program, then a new ARR is likely required. Users associated with an entity requiring a new ARR will receive an “Update ARR” pop-up message upon logging into the system.

Implemented during the third round of the ReConnect Program, an ARR, if approved, now grants all users listed on the ARR access to the entities account for the ReConnect Program Online Application System, Community Connect Program Online Application System, and the Reporting & Compliance System.

Users that are not assigned the Representative Signature Certifier or Administrator role at the time of this ARR will still need to be added separately.

Any entities who requested to only be granted access to the ReConnect Program Online Application System during the third round will need to submit an Updated Authorized Representative Request.

Question: How do I get a verified (Level II) eAuthentication (eAuth) account?

Answer: To create a new eAuth account, you will go to the eAuth website at www.eauth.usda.gov/eauth/b/usda/home, and Click the Create Account tab, select Customer and click Continue. You will be directed to Login.gov to complete your eAuth account setup.

After your eAuth account has been established, you will need to verify your identity to gain access. To do this you will login to reporting-and-compliance.rd.usda.gov/s/ and select Verify my identity at Login.gov-Recommended and click Continue. You will be directed to Login.gov to complete the verification process and gain your Level II access. You will be required to provide some types of identification for this process to complete.

NOTE: RUS cannot retrieve your eAuth ID or password for you. Please visit the eAuth website to obtain this information.

Question: Can we begin working on the application before the Authorized Representative Request is approved?

Answer: No. Applicants cannot begin working on an application in the application system until the Authorized Representative Request (ARR) is approved. ARR approval typically takes about two business
days. However, applicants are strongly encouraged to review the ARR process and obtain the necessary resolution ahead of time. In addition, applicants are encouraged to begin assembling necessary documents and information ahead of time.

**Question:** Will data from a previously submitted application be available in the ReConnect Online Application System?

**Answer:** Users will not be able to access any information previously inputted into a specific ReConnect application. This includes information related to the project, service area(s), network, financials, evaluation criteria, environmental, licenses and agreements, and certifications tabs.

**Question:** Will consultants, including consulting engineers, have access to the online application site for clients?

**Answer:** Yes. Applicants can grant consultants access to the online application system. Once assigned the role of “Consultant,” they will then be able to access multiple applications within the system. NOTE: All individuals who log into the system must have a USDA verified (Level II) eAuth account.

**Question:** How do I start my application for ReConnect funds?

**Answer:** Begin by reviewing the February 21, 2024 ReConnect NOFO and the ReConnect program regulation (7 CFR 1740 as revised – information is available at this link: https://federalregister.gov/d/2024-03484) for current program and eligibility requirements. The ReConnect NOFO, regulation, program guide, and other resources including program information, fact sheets, and technical assistance materials are available at https://www.usda.gov/ReConnect. All applications must be submitted through the RUS online application system, which will open on March 22, 2024, and remain open until 11:59 a.m. Eastern on May 21, 2024.

**Question:** My organization uses Internet Explorer, and I am having problems accessing the application system. What can I do to improve my access to the system?

**Answer:** We recommend that you do not use Internet Explorer or Safari when using the application system. Both can create technical hitches that result in incomplete applications. Google Chrome and Microsoft Edge are the recommended browsers to use when completing your application.
Question: My application timed out and I lost the information entered into the system. Can USDA recover this information?

Answer: USDA cannot recover any information lost from not saving your application. We recommend saving your application multiple times during the process. For security, the system times out after 15 minutes of inactivity, and you will receive a warning message at approximately 14 minutes and 30 seconds. If an application times out without being saved, you will lose all information entered since the last time you saved the application.

Question: When will USDA announce awards for the new round of funding?

Answer: For current award announcements, visit the ReConnect Program website at https://www.usda.gov/ReConnect and click "Subscribe" under the "Stay up to date" section at the bottom of the home page.

Question: What is considered an affiliate company? What is the ownership threshold for considering a company an affiliate?

Answer: "Affiliate" or "Affiliated Company" of any specified person or entity means any other person or entity directly or indirectly controlling of, controlled by, under direct or indirect common control with, or related to, such specified person or entity, or which exists for the sole purpose of providing any service to one company or exclusively to companies which otherwise meet the definition of affiliate. This definition includes Variable Interest Entities as described in Financial Accounting Standards Board Interpretation (FIN) No. 46(R), Consolidation of Variable Interest Entities. For the purpose of this definition, "control" means the possession directly or indirectly, of the power to direct or cause the direction of the management and policies of a company, whether such power is exercised through one or more intermediary companies, or alone, or in conjunction with, or pursuant to an agreement with, one or more other companies, and whether such power is established through a majority or minority ownership voting of securities, common directors, officers, or stockholders, voting trust, holding trusts (other than money exchanged) for property or services.

Question: How does USDA know where broadband services at 25 Mbps down, 3 Mbps up speeds are currently provided?

Answer: Rural Development uses several methods to verify whether a particular Proposed Funded Service Area (PFSA) currently has 25 Mbps downstream, 3 Mbps upstream broadband service. We will
post a Public Notice Filing (PNF) of the proposed service area on the ReConnect webpage under the “Public Notice Filings” tab at https://www.usda.gov/ReConnect, and service providers in those areas can submit a Public Notice Response (PNR) indicating whether they already provide 25 Mbps downstream, 3 Mbps upstream service. Then, USDA will conduct Service Area Validations (SAVs) within the areas of the PFSA(s) where a PNR is filed.

Service area validations also include desktop research using currently available data. Additionally, we will send subject matter experts (SMEs) to service area locations where a PNR is filed to oversee field tests to determine if the area(s) meet eligibility requirements, to verify the availability of 25 Mbps downstream, 3 Mbps upstream service, and validate other aspects of the application.

**Question: Does RUS require audited financial statements as part of the application?**

**Answer:** Yes. Audited financial statements are required. The following types of entities must submit unqualified, comparative audited financial statements for the previous fiscal year from the date your application is submitted:

- Corporation
- Commercial business
- Limited Liability Company
- Cooperative

The following types of entities (non-Federal entities) are subject to 2 CFR 200 and must have a single audit conducted:

- Authority
- Municipality
- Public body
- Public Power or Utilities District
- Indian Tribe
- Tribal government
- Higher education
- Non-profit
- Territory or possession of the United States
- A state or local government
If an application is submitted and the most recent year-end audit has not yet been completed, you can submit the most recent, completed, unqualified, comparative audit.

Additional Guidance:

- An applicant can use the consolidated audit of the parent as long as the parent fully guarantees the loan, or in the case of a grant, guarantees construction will be completed as approved in the application, or the parent will repay the grant to RUS. If the applicant has more than one parent, then each parent’s audits must be submitted, and each parent must fully guarantee the award.

- A parent company that has subsidiaries applying for funding based on the parent’s audited financials can only guarantee one application for funding under this notice. If multiple subsidiaries apply based on the same parent audited financial statement, at the agency’s discretion, only one application can be funded.
  
  However, if the audit of the parent company includes consolidating schedules of the parent and its subsidiary (or subsidiaries) along with eliminating entries that add up to the consolidated totals, more than one subsidiary may apply based on the same parent audited financial statement. In this scenario, the consolidated audit should also include supporting schedules of the subsidiary including a cash flow statement and any auditors notes regarding account balances, accounts receivables and/or payable and any intercompany transactions or agreements with the parent company.

- For government entities, financial statements must be accompanied with certifications regarding unrestricted cash that may be available to the applicant on a yearly basis.

**Question:** Can an applicant use fiscal year projections when completing the financials component of the application, or must they use calendar year projections?

**Answer:** You can submit your financial information using a calendar year or fiscal year basis for historical and forecasting, but the methodology must be consistent across all years. If you choose to provide financial information on a fiscal year basis, you must indicate the fiscal year in the assumptions. We recommend you use the same basis as the unqualified, comparative, audited financial statements submitted with the application.

**Question:** Would two entities owned by the same holding company be able to submit separate applications as separate entities proposing to serve different areas? Or is only one application allowed because both entities are owned by the same holding company?
**Answer:** As long as each entity is organized as a standalone company and can meet all other eligibility requirements as standalone entities, then each entity can submit its own application. However, if a consolidated unqualified, comparative audit containing each entity’s financial information is not available from the parent holding company, each company must independently provide the unqualified, comparative audited financial statement for the previous fiscal year of the applicant from the date the application is submitted.

**Question:** Can a subsidiary use a parent company’s financials when preparing the pro forma financial analysis?

**Answer:** Financial information and projections must be those of the applicant, and consolidated projections are not acceptable. Applicants must use their own standalone projections.

**Question:** What needs to be included for the real property question? (Example: Does the applicant own any real property? If so, upload all applicable copies of real estate deeds or any real property schedules). Do applicants need to upload documents for each property that they own, or can they use a real property schedule that lists all of their real property?

**Answer:** The question regarding real property is intended to determine whether or not a mortgage would be required if the project is awarded. To satisfy this requirement, upload a copy of the company’s real estate deeds and real property schedule. Real estate deeds are not required at the time of the application submission. However, RUS may request copies of real estate deeds if an award is made. NOTE: Applicants for any 100 percent grant product must select “no” in response to this question in the application system.

**Question:** Do we need to upload all lease agreements in our ReConnect application? What about leases that would be contingent on receiving an award?

**Answer:** Yes, all lease agreements, regardless of status, must be uploaded into the application. The ReConnect Online Application System allows applicants to select the “Agreement Status” to indicate whether the agreement is not required, a draft, an existing agreement, pending approval, contingent upon award, or contingent upon availability of funds.

**Question:** Will ReConnect fund middle-mile only projects?
Answer: The intent of the ReConnect program is to bring high-speed broadband service to rural residences and businesses. Therefore, stand-alone, middle-mile projects are not eligible. However, middle-mile facilities are eligible if they are necessary to bring sufficient broadband service to all premises in the Proposed Funded Service Area.

Question: Can an applicant apply for Community Connect and ReConnect funds for different Proposed Funded Service Areas (PFSA)?

Answer: Yes. You can apply for funds from both programs if the projects serve different Proposed Funded Service Areas.

Question: Can one applicant request funding from all five funding categories?

Answer: No. You must choose one type of funding (100 percent loan, loan-grant combination, 100 percent grant, 100 percent grant for Alaska Native Corporations, Tribal Governments, Colonias, Persistent Poverty Areas, and Socially-Vulnerable Communities,) from which to apply, and you can submit only one application. You can, however, begin multiple applications in the application system. NOTE: if you decide to change to another funding type, you must start a new application from the beginning. The system will not transmit data from one application to another.

Question: If an applicant applies for but does not receive a 100 percent grant, will they be considered for the 50 – 50 percent combination loan-grant category?

Answer: No. You can submit only one application within the application window specified in the February 21, 2024 ReConnect NOFO. An application submitted for one funding category is not eligible for any of the other funding categories.

Question: Does USDA have sample language for the Authorized Representative Request (ARR)? To whom and to where should the ARR and board resolution be submitted?

Answer: Authorized Representative Request (ARR) instructions and sample board resolution language are available on the ReConnect website at https://www.usda.gov/ReConnect under “Forms and Resources.” The instructions provide two sample resolutions featuring a corporation, and a Limited Liability Company (LLC). If the applicant is an entity other than a corporation or LLC, the content of the sample resolutions can be modified to reflect the applicant’s legal structure. Once completed, the board approved resolution must be uploaded within the online application system as a part of the AAR.
Question: Can I use my RD Apply or eAuth login for access to ReConnect?

Answer: No. Although both use verified (Level II) eAuthentication for logins, the ReConnect program does not use the RD Apply system. To use the ReConnect online application system, you must have an approved ARR in ReConnect. The RUS ReConnect online application system can be found at https://www.usda.gov/ReConnect.

Question: Are there any application fees required in the ReConnect application?

Answer: No application fees are required to submit an application to USDA. However, you may incur pre-application expenses related to the creation and submission of an application. Pre-application expenses must fund eligible costs and be budgeted within the application in order to be reimbursed by Rural Development. Funding for pre-application expenses may not exceed five percent of the award. Pre-application expenses must be included in the first request for advance of award funds and will be funded with either grant or loan funds. If the funding category applied for has a grant component, then grant funds will be used for this purpose. If pre-application expenses are not included in the first request for advance of award funds, they will become an ineligible purpose. Costs associated with satisfying the environmental review requirements are eligible for reimbursement under this category. Up to 3% three percent of the total award can be used to cover costs associated with satisfying the environmental review requirements. The environmental review costs count as part of the overall 5% percent allowable for pre-application expenses. If an applicant applied for funding in ReConnect Round Four, preapplication expenses may be eligible for reimbursement if these expenses support the application in response to this notice, such as engineering design, market survey, and subscriber projections. Note, however, that RUS, in its sole discretion, reserves the right to accept or reject expenses associated with round four. Otherwise, preapplication expenses may only be reimbursed if they are incurred after the publication date of the Notice of Funding Opportunity published February 21, 2024 and are properly documented. Additional details concerning pre-application expenses can be found in the Notice of Funding Opportunity.

Question: Can expenses incurred under the previous round of ReConnect be eligible for reimbursement under the current round?

Answer: Yes, pre-application expenses that were incurred under the previous round of ReConnect, but benefit an application for this round, may be funded. For round 5, the previous ReConnect round is round 4. Pre-application expenses are limited to up to the five percent of the total award amount.
Question: Do applicants need to submit a legal opinion?

Answer: Applicants are required to submit a legal opinion. However, for this round only, applicants are not required to submit a legal opinion as part of the application. Applicants that receive an award must still provide the legal opinion as part of closing the award. The document must address your ability to enter into the award documents, describe all material pending litigation matters, address your ability to pledge security as required by the award documents, and address your ability to provide broadband service under state law. Legal opinions submitted under prior ReConnect rounds should not be resubmitted. Applicants should provide a new legal opinion for the current round of funding.

NOTE: We recommend the legal opinion be prepared according to the sample format available under “Forms and Resources” at this link: https://www.usda.gov/ReConnect. This sample can be modified to meet your needs. Additionally, we recommend all such modifications be reviewed with RUS staff prior to final submission. Additional details on legal opinions required for the ReConnect program can be found in 7 CFR 1740.60(d)(9), available at this link: https://go.usa.gov/xex6t.

Question: Are the evaluation criteria datasets available for download?

Answer: Yes.

More information about ReConnect Program Service Area Map Datasets can be found at this link: https://go.usa.gov/xe3GH.

Question: What datasets are available to the public as they relate to the ReConnect Program Service Area Map?

Answer: The ReConnect Program Service Area Map Datasets can all be viewed at this link: https://www.usda.gov/ReConnect.

Question: Can other federal funds be used to meet the ReConnect Program matching requirement for 100 percent grants?

Answer: Typically, federal funds from other programs cannot be used as match for ReConnect funds unless the program under which the non-ReConnect funds were awarded has specific statutory authorization allowing that program's funds to be used as match for other federal programs.
Question: Can federal funds received by my State be used as a match for the ReConnect Program?

Answer: Federal funds administered to municipalities are still considered federal funding. Typically, federal funds from other programs cannot be used as match for ReConnect funds unless the program under which the non-ReConnect funds were awarded has specific statutory authorization allowing that program’s funds to be used as match for other federal programs.

Question: Can ReConnect funds be used for monitoring expenses associated with National Historic Preservation Act (Section 106) reviews?

Answer: Yes, as long as the costs of the monitors are considered part of construction costs and are capitalized. Monitoring expenses are considered professional costs and are eligible to be funded using up to 3 percent of the total award amount (as part of the maximum of 5 percent which can cover pre-application expenses). Awardees are required to submit associated invoices, along with a copy of the agreement with their state or Tribal historic preservation office.

Question: What areas are eligible for ReConnect funding?

Answer: To be eligible for ReConnect funding, a Proposed Funded Service Area (PFSA) must be:

1. Rural. According to 7 CFR 1740.2 (available at this link: https://go.usa.gov/xexFF), a rural area is any area not located within:
   - A city, town, or incorporated area with a population greater than 20,000
   - An urbanized area contiguous and adjacent to a city or town with a population greater than 50,000
2. Lack sufficient access to broadband service as defined in the ReConnect NOFO
   - For this round of funding, 90 percent of households within each proposed service area must lack sufficient access to broadband. Sufficient access to broadband is defined in the February 21, 2024 ReConnect NOFO as “any rural area in which households have fixed, terrestrial broadband service delivering at least 25 Mbps downstream, 3 Mbps upstream.

In addition, 7 CFR 1740.2 (available at this link: https://go.usa.gov/xexFt) states that mobile or cellular and satellite services – including systems that use satellite backbone facilities to connect to the internet –
will not be considered when determining whether sufficient access to broadband exists. Additionally, areas with current broadband service from unlicensed wireless facilities, or those that have an enforceable commitment associated with unlicensed wireless facilities, are eligible for funding under this notice.

A PFSA cannot include areas considered ineligible for funding under the ReConnect program. The ReConnect Program Service Area Map identifies ineligible and potentially ineligible areas due to a protected broadband borrower currently providing sufficient access to broadband.

Both the regulation and ReConnect NOFO provide information on this issue. The ReConnect Program Service Area Map (available at this link: https://www.usda.gov/ReConnect) does not provide information on where sufficient access to broadband currently exists.

**Question:** What is an Enforceable Commitment and how will they impact the ReConnect Program?

**Answer:** As noted in the February 21, 2024, ReConnect NOFO, an Enforceable Commitment is a legally enforceable obligation by any federal, state, or local agency, utilizing Federal Funds, to fund a broadband project that will provide to all households in the service area at least 100 megabits per second (Mbps) downstream and 20 Mbps upstream.

Areas that have an Enforceable Commitment at the time of publication of the February 21, 2024, ReConnect NOFO are ineligible for ReConnect funds. However, if an applicant submits evidence that the entity that received the Enforceable Commitment has not deployed broadband service as required by the awarding Agency’s regulations or award documents, the Agency may consider such area eligible for funding after consultation with the awarding agency. Areas with Enforceable Commitments are identified in a GIS layer located in the RUS mapping tool.

**Question:** The RUS Service Area Map does not differentiate between “Protected Broadband Borrowers” that have built to 25/3 Mbps (therefore ineligible) and those that have not. Does RUS intend to differentiate them on the tool, or is it up to applicants to determine which Protected Broadband Borrower areas are eligible, and which are not?

**Answer:** RUS currently does not list broadband download and upload speeds on either the Protected Broadband Borrower or Pending Applications layers of the Service Area Map (available at this link: https://www.usda.gov/ReConnect). You must exercise your own due diligence in determining broadband
speeds in potential Proposed Funded Service Area(s). RUS will review all submitted application information and will contact the RUS borrower to determine if sufficient access to broadband exists.

**Question: What are the requirements for a Pledged Deposit Account?**

**Answer:** RUS has modified the grant agreement to permit awardees to deposit the required matching and other required funds into the Pledged Deposit Account (PDA) on a rolling basis. If the matching funds are provided by a third party, a commitment letter from the third party must be submitted indicating that the funds will be available as needed to support the deposit of funds into the PDA. If the commitment letter is not provided, then the application may be rejected. The matching contribution can be used only for eligible purposes. If the applicant elects to initiate a loan to satisfy the matching requirement, documentation must be included as part of the application indicating the terms and conditions for the loan and that the grant funded assets cannot be used as collateral for the matching funds loan. The loan must be entered into, and funds transferred into the applicant’s accounts by the closing of the award.

**Question: Must all matching funds be deposited into the Pledged Deposit Account (PDA) in order to receive an award?**

**Answer:** No; RUS has agreed to modify the grant agreement to permit awardees to deposit the required matching and other required funds into the PDA on a rolling basis.

If the matching funds are provided by a third party, a commitment letter from the third party must be submitted as part of the application indicating that the funds will be available as needed to support the deposit of funds into the PDA. If the commitment letter is not provided, then the application may be rejected. If the applicant elects to initiate a loan to satisfy the matching requirement, documentation must be included as part of the application indicating the terms and conditions for the loan and that the grant funded assets cannot be used as collateral for the matching funds loan. The loan must be entered into, and funds transferred into the applicant’s accounts by the closing of the award.

**Question: If an applicant wants to use the ILOC option, is an unqualified comparative audit required in the application?**

**Answer:** Yes. The audit requirement remains if an applicant intends to replace the standard grant security agreement with an ILOC. NOTE: Non-federal entities are only required to submit a single audit, pursuant to 2 CFR 200.
Question: Are the expenses associated with the Irrevocable Letter of Credit (ILOC) considered a pre-application expense that can be reimbursed?

Answer: ILOC expenses are considered operating costs of the applicant and are not reimbursable by the ReConnect Program. The ILOC must be for the full amount of funding requested and must remain in place at that level until the completion of the project. The ILOC should be secured outside the operation that is being awarded a grant.

Question: Our entity has applied for a Unique Entity Identifier (UEI) but we have not received it. How do we submit our Authorized Representative Request (ARR) if we do not have a UEI?

Answer: USDA is aware of delays related to obtaining a UEI through SAM.gov. USDA will use an alternative identifier on a temporary basis to allow entities to begin an application for the ReConnect Program while they await their UEI. Applicants who are assigned a temporary identifier will provide this information during the ARR process and this temporary identifier will be replaced when the entity’s UEI has been issued. To request a temporary identifier, please use the Contact Us form available at: https://usda.gov/ReConnect.

Entities with an existing UEI will not be issued a temporary identifier.

NOTE: The temporary identifier assigned cannot be used with any other program, either within USDA or at any other federal agencies. This temporary identifier is only intended to be used for the ReConnect Program.

Question: Can I account for installation labor costs as a professional service?

Answer: No, installation labor costs are not considered a professional service. Professional services may include, but are not limited to, costs associated with environmental reviews, post-award monitoring expenses, architectural services, and engineering services.

Question: Can ReConnect loan funds be used as matching funds for a BEAD project?

Answer: Yes, ReConnect loan funds may be used as match on a BEAD project as long as the items purchased with such funds for the ReConnect award can also be used for the BEAD project (i.e., the items are common facilities to both projects). Loan funds may not be used as matching to pay for professional services for both projects. Additionally, loan funds may not be used for expenditures not
already in the RUS-approved budget for the award. Loan recipients must make sure that they comply with all BEAD Program requirements as well as ReConnect requirements if using loan funds as match. For specific questions on matching eligibility for BEAD, applicants should contact NTIA.

**Question:** Are applicants receiving Enhanced Alternative Connect America Cost Model (E-ACAM) funding eligible for Reconnect 100% grant or loan-grant combinations?

**Answer:** Yes. E-ACAM applicants can apply for ReConnect grants or loan-grant combinations if the ReConnect PFSA is located outside of the incumbent local exchange carrier (ILEC) territory. E-ACAM support is only for the applicant’s study area boundary of the ILEC territory.

**Question:** What documentation are you required to submit if you have existing long term debt?

**Answer:**

- For 100 percent loan and loan-grant combination awardees, if you have long-term debt that is 100 percent secured against real property, you will be required to execute a shared mortgage. You must also provide a letter from the lender certifying shared first lien status. If the long-term debt is not secured by real property and is secured by your personal property, you will be required to execute an intercreditor agreement.
- For 100 percent grant applications, if you have long-term debt, you must provide evidence that the lender has given consent for you to enter into this agreement with RUS and has released or subordinated its lien on all grant assets funded under the award, as well as on the matching funds required, if applicable.
- For any long-term debt that is held by a third party, such as your parent company, that is 100 percent secured against your assets, you, the lender, and the third party will also be required to execute a shared mortgage, in addition to a letter from the lender certifying shared first lien status within the application. If the long-term debt is not secured by real property and is secured by your personal property, you will be required to execute an intercreditor agreement.

**Question:** May a refurbished and restored communication equipment shelter be used on a ReConnect project in lieu of a new communication equipment shelter?

**Answer:** Refurbished and restored communication equipment shelters may be used under the ReConnect program meeting the following requirements:
• Awardees must document the cost is less for refurbished and restored than for new communication equipment shelters.

• Communication equipment shelter has a warranty approved by awardee’s in-house RUS approved engineer or Consultant Engineer.

• Communication equipment shelter is refurbished and restored by qualified restoration crews for RUS projects and approved by awardee’s in-house RUS approved engineer or Consultant Engineer.

• When determining the reliability for deployment, the awardee’s in-house RUS approved engineer or Consultant Engineer considered the date of refurbishment and restoration and the economic life of the project.

• Copies of the architectural drawings by the original manufacturer must be included with the purchase when required.

• All refurbished and restored communication equipment shelters in RUS projects must meet the RUS Buy American Requirements (7 CFR 1787 or BABAA).

**Question: Who may qualify to refurbish and restore the communication equipment shelter?**

**Answer:** A restoration crew may be approved by the in-house RUS approved engineer or Consultant Engineer to refurbish and restore the communication equipment shelter. The awardee shall ensure that the selected restoration crew meets all federal, state, and local licensing requirements.

**Question: May we use new construction materials that were purchased and placed in inventory but never installed (new old stock or NOS) for our ReConnect Project?**

**Answer:** NOS construction materials may be used for the ReConnect project when the following requirements are met:

- NOS construction materials must be in their original packaging and have never been previously installed.
- NOS construction materials must have minimal deterioration due to age or exposure. If there is any deterioration, it must not be critical to the functionality of the NOS construction materials.
- It must be documented that the cost is less for NOS construction materials than for new.
When determining the reliability for employment of NOS construction materials, the awardee’s in-house RUS approved engineer or Consultant Engineer considered the economic life of the project.

All NOS construction materials in RUS projects must meet the RUS Buy American Requirements (7 CFR 1787 or BABAA).

**Question:** Does utilizing refurbished and restored communication equipment shelters or NOS construction materials impact the composite economic life of the ReConnect Project?

**Answer:** When the reliability is determined by the awardee’s in-house RUS approved engineer or Consultant Engineer, the economic life of the project is considered when approving the use of these materials. It is the responsibility of the Awardee to ensure the composite economic life of the ReConnect Project remains unchanged.

**Question:** What are some examples of NOS construction materials we may use for the ReConnect project?

**Answer:** Materials directly used in the construction of the ReConnect broadband network may be used as NOS materials including but not limited to the following items: fiber optic cable, conduit, pedestals, handholes, line cards, network interface device, fiber patch panels, etc. It is the responsibility of the awardee’s in-house RUS approved engineer or Consultant Engineer to ensure the service provided by the ReConnect project is reliable, that it conforms to the latest technical standards, and that it offers the longest service life reasonably possible.

**Eligibility Inquiries**

**Question:** Who is eligible to receive ReConnect funds?

**Answer:** As defined in 7 CFR 1740.9 (available at this link: https://go.usa.gov/xextf) to be eligible for funding, an applicant can be either a nonprofit or for-profit organization, and must take one of the following forms:

- Corporation
- Limited Liability Companies and Limited Liability Partnerships
- Cooperative or mutual organizations
• States, local governments, or any agency, subdivision, instrumentality, or political subdivision thereof
• A territory or possession of the United States
• An Indian Tribe as defined in section 4 of the Indian Self-Determination and Education Assistance Act (25 U.S.C. 450b – available at this link: https://go.usa.gov/xexF9)

Individuals and legal general partnerships are not eligible entities. In addition, co-applicants are not eligible. If two entities want to partner in delivering broadband to areas without sufficient access, one entity must take the lead on submitting an application. In this case, intercompany agreements can be used to account for revenues and expenses on the applicant’s financial projections. However, based on the existing financial and security agreements, Rural Development can require that both – or other entities – be parties to the award documents, or to guarantee the award.

Question: What kinds of partnerships are eligible to apply for ReConnect funding?

Answer: Limited Liability Partnerships (LLP) can apply as eligible entities. An LLP has at least two partners in the relationship, and all partners are equally responsible for all considerations of the relationship including management, liability, and taxes, among other considerations. Co-applicants and legal general partnerships formed with individuals are not eligible entities. See 7 CFR 1740.9(b) – available at this link: https://go.usa.gov/xexFP - for additional details on the eligibility of partnerships.

Question: I’m looking for help getting broadband internet at my residence. Is this program for me?

Answer: Individuals are not eligible to apply for funding under this program.

Question: Is an applicant eligible if current network speeds are less than 25 Mbps downstream, 3 Mbps upstream?

Answer: If your organization is not currently providing 25 Mbps downstream, 3 Mbps upstream in the proposed funded service area, and your application meets all other program requirements, your organization is eligible to apply for the ReConnect program.

Question: If an applicant is proposing to place fiber facilities through an ineligible area to get to an eligible area, can the fiber facilities be used to provide service to the ineligible areas?

Answer: You may propose fiber facilities in an ineligible area in to serve both eligible and ineligible areas; however, you cannot use award funds or matching funds to fund the portion of the fiber facilities that...
serve the ineligible area. For example, if a 100-count fiber cable is proposed to pass through ineligible and eligible areas and 30 fibers will serve the ineligible area, then 30 percent of the total cost of the fiber facility (installation and materials) must be funded through non-ReConnect and non-matching funds.

Question: Is a Wireless Internet Service Provider eligible for ReConnect funds?

Answer: Wireless Internet Service providers can be eligible for ReConnect funds provided they meet the program requirements. Technology which can deliver 100 Mbps downstream, 100 Mbps upstream service at the same time to every premises in the Proposed Funded Service Area (PFSA) is eligible for funding. However, projects proposing to use unlicensed wireless facilities are ineligible for funding under the ReConnect NOFO published February 21, 2024. More information about the ReConnect program can be found at: https://www.usda.gov/ReConnect.

Question: Can areas under consideration for other federal funds money be eligible for ReConnect?

Answer: Yes. The NOFO published on February 21, 2024 provides that areas receiving, or under consideration for other Federal funds are eligible for ReConnect funding as long as the areas in question do not have existing service at the minimum level of sufficient access to broadband, (25/3 Mbps for the current NOFO or as long as an entity has not already received other Federal funding to construct facilities providing at least 25/3 Mbps service in those areas. Applicants submitting a project to serve an area in which an entity has already received, or will be receiving, other Federal funding should explain in the application why ReConnect funding is being requested and why RUS should provide additional funding. Awardees that receive both other Federal funds and ReConnect funding must submit a statement certifying that the funds requested from ReConnect have not and will not be reimbursed by another Federal award and must keep separate accounts for each source of funding to track the uses of the funding to support the certification statement submitted with the ReConnect application.

Question: Can I apply for ReConnect funding to serve an area where I have received funding from another federal program to serve?

Answer: As defined in the ReConnect NOFO published on February 21, 2024, areas that have an enforceable commitment at the time of publication of this notice are ineligible for ReConnect funds. However, if an applicant submits evidence that the entity that received the enforceable commitment is not providing the required level of service, the Agency may consider such area eligible for funding.
Enforceable commitment means any federal, state, or local agency, utilizing federally appropriated funds, that has issued an offer of funding to an entity and the entity has accepted that offer. The offer must include requirements that all premises in the offer area receive access to a minimum of 100 megabits per second (Mbps) downstream and 20 (Mbps) upstream service. Areas where an enforceable commitment exists are identified in a GIS layer located in the RUS mapping tool.

**Question:** If a company applies for the 100 percent grant product and USDA finds households with 25 Mbps downstream, 3 Mbps upstream service, will the entire application be thrown out, or can the applicant modify its Proposed Funded Service Area (PFSA) in the application?

**Answer:** No. You cannot modify your application to remove one or more PFSAs found ineligible by USDA. Multiple PFSAs are treated as separate, standalone service areas when determining the percentage of a PFSA that lacks sufficient access to broadband. This means each individual PFSA must meet the eligibility requirement. If any service area in a competitive application does not meet these eligibility requirements, the entire application will be disqualified.

**Question:** How will USDA staff judge applications which propose service to the same Proposed Funded Service Area (PFSA)?

**Answer:** USDA will not fund more than one project that serves a sole geographic area. Invariably, applicants do propose service areas that overlap – varying from minor areas of the territory that can be significant with respect to households involved – to larger areas of the service territory that contain few, if any, households or businesses. As a result, accounting for every overlap circumstance is not possible. Nevertheless, it is the agency’s intent to make as many eligible applications viable for consideration as possible. This means we can:

- Determine the overlap to be so insignificant that no action by RUS is necessary
- Request one or more of the applications be revised to eliminate the overlapping territory
- Choose one application over another, considering factors such as:
  - the amount of assistance requested
  - the number of awards already selected in the region or state
  - an assessment of area needs
- Simply choose the project that scores higher – or in the judgement of the agency – is more financially feasible
We reserve the right to request additional information concerning any part of your application, including the Proposed Funded Service Area. The applicant has 30 days to return the requested information. Failure to do so can result in application rejection.

Question: Are service areas covered by RUS Broadband Loan borrowers eligible for ReConnect funding?

Answer: As detailed in the Consolidated Appropriations Act, 2021 (Public Law 116-260 – available at this link: https://go.usa.gov/xexM2), the service areas of existing RUS borrowers without sufficient access to broadband (as defined in the February 21, 2024, ReConnect NOFO) are eligible for ReConnect funding. However, current RUS Broadband Borrowers that have received funding to provide sufficient access to broadband but have not yet built-out their system are ineligible to apply for funding for these service areas.

Question: Are areas that received grants under the RUS Community Connect Grant Program eligible for ReConnect funding?

Answer: Service areas that received grants under the RUS Community Connect Grant Program are eligible if they do not have sufficient access to broadband, except for those grants still under construction and proposing a service speed of at least 25 Mbps downstream, 3 Mbps upstream. The ReConnect Program Service Area Map (located at this link: https://tinyurl.com/4m7bax9m) provides a layer that illustrates current RUS borrowers and projects still under construction.

Question: Are service areas that received 100 percent grants under the RUS Broadband Initiatives Program (BIP) eligible for ReConnect funding?

Answer: Service areas that received a 100 percent BIP grant are eligible if they do not have sufficient access to broadband.

Question: Are areas that received smart grid funding under an RUS Electric Program loan eligible for ReConnect Funding?

Answer: Areas that receive smart grid funding from the RUS Electric Program can be eligible for ReConnect funding as long as the smart grid facilities are not leveraged to provide sufficient access to broadband.
**Question:** Are applicants who receive Enhanced Alternative Connect America Cost Model (E-ACAM funding eligible to apply for the ReConnect Program?

**Answer:** Applicants that are receiving E-ACAM funding are only eligible for a ReConnect 100 percent loan but not grant funding.

**Question:** What is the definition of a “Broadband Loan” for the purposes of the ReConnect Program?

**Answer:** For the ReConnect Program only, an RUS broadband loan is defined as “any loan that has been approved or is currently under review by RUS after the beginning of fiscal year 2000 in the Telecommunications Infrastructure Program, Farm Bill Broadband Program, Broadband Initiatives Program, or the ReConnect Program.”

Broadband loans that were rescinded, are in default, or loan terms and conditions of which were not met, are not included in the ReConnect definition of a “broadband loan” as long as the entity under consideration for ReConnect funding has not previously defaulted on, failed to meet the terms and conditions of, or had rescinded, an RUS broadband loan.

**Question:** Will my project be disqualified if FCC Form 477 data indicates my Proposed Funded Service Area (PFSA) has sufficient access to broadband?

**Answer:** Rural Development uses several methods to verify whether a particular PFSA currently has 25 Mbps downstream, 3 Mbps upstream broadband service. We will post a Public Notice Filing (PNF) of the proposed service area on the ReConnect webpage under the “Public Notice Filings” tab at https://www.usda.gov/ReConnect, and service providers in those areas can submit a Public Notice Response (PNR) indicating whether they already provide 25 Mbps downstream, 3 Mbps upstream service. Then, USDA will conduct Service Area Validations within the areas of the PFSA(s) where a PNR is filed.

Service area validations also include desktop research using currently available data. Additionally, we will send subject matter experts (SMEs) to service area locations where a PNR is filed to oversee field tests to determine if the area(s) meet eligibility requirements, to verify the availability of 25 Mbps downstream, 3 Mbps upstream service, and validate other aspects of the application.
Additionally, RUS does not maintain or control FCC Form 477 data. To the extent possible, you must identify all existing providers in the PFSA and indicate what level of service is actually being provided. You are not required to treat current, publicly-available FCC Form 477 data (additional information is available at this link: https://go.usa.gov/xeqdX) as unquestionable proof of what speed service currently exists. FCC Form 477 data can be used as one source of data regarding sufficient access to broadband.

**Question:** Can a competitive local exchange carrier (CLEC) apply for funding?

**Answer:** A Competitive Local Exchange Carrier (CLEC) is an eligible entity as long as it meets all eligibility requirements as outlined in the February 21, 2024, ReConnect NOFO.

**Question:** Can applicants apply for more than one service area?

**Answer:** A single application can propose multiple service areas. For eligibility purposes, if you are applying for multiple Proposed Funded Service Areas (PFSAs), each service area will be evaluated on a standalone basis when determining whether a PFSA has sufficient access to broadband. If any service area in a competitive application does not meet the eligibility requirements, the entire application will be disqualified.

When an application is evaluated for technical feasibility, the proposed PFSAs are evaluated together. The determination of technical feasibility is based on the entire network proposed for construction with ReConnect funds.

**Question:** What is a Socially Vulnerable Community?

**Answer:** Socially Vulnerable Community means a community or area identified in the Center for Disease Control’s Social Vulnerability Index with a score of .75 or higher. For the purposes of the February 21, 2024 Funding Opportunity Announcement, Puerto Rico, Guam, America Samoa, Northern Mariana Island, Palau, Marshall Islands, the Federated States of Micronesia, and the U.S. Virgin Islands are considered Socially Vulnerable Communities. A GIS layer identifying Socially-Vulnerable Communities is available at this link: https://www.usda.gov/ReConnect.

**Question:** Colonias are very small geographic areas. How do we meet the 75% test for the 100% grant category that requires no match for when serving Alaska Native Corporations, Tribal Governments, Colonias, Persistent Poverty Areas and Socially Vulnerable Communities?

**Answer:** A proposed project can meet any of the five tests listed in that funding category.
Specifically with regard to Colonias, 75% of the total number of your proposed funded service areas (PFSAs) must include one or more eligible Colonias to be eligible for the 100% grant category that requires no match for projects serving Alaska Native Corporations, Tribal Governments, Colonias, Persistent Poverty Areas and Socially Vulnerable Communities.

For example, if your proposed project has one PFSA, then that PFSA would need to cover at least one eligible Colonia. If the proposed project has five PFSAs, then at least four of the five PFSAs would each need to cover at least one eligible Colonia.

**Question:** I am applying for the 100 Percent Grant for Alaska Native Corporations, Tribal Governments, Colonias, Persistent Poverty Areas and Socially Vulnerable Communities. Can we have our PFSAs be a mix of Colonias, Persistent Poverty Areas and Socially Vulnerable Communities with the combined total of the three being at least 75% of all PFSAs combined?

**Answer:** No. An applicant’s PFSAs cannot contain a combination of Colonias, Persistent Poverty Areas, and Socially Vulnerable Communities to meet the 75 percent eligibility threshold. Applicants must meet the 75 percent threshold by serving Colonias, Persistent Poverty Areas, or Socially Vulnerable Communities.

**Question:** I am a Tribal applicant. Can I self-certify whether broadband service exists on land owned by the Tribe?

**Answer:** Yes, Tribal entities proposing broadband service on Tribal Lands may self-certify that sufficient access to broadband does not exist on the Tribal Lands covered under the PFSA; however, the RUS will still perform a service area validation to determine whether sufficient access to broadband exists, as required by the ReConnect authorizing statute.

**Question:** If a Tribe has funding pending from another agency’s program can the Tribe still self-certify that they are unserved?

**Answer:** Yes, a tribe can still self-certify to the existence of broadband service but will have to justify why ReConnect funds would not duplicate the purposes of the other federal award.

**Question:** Does another agency’s funding approval on tribal lands to an entity other than the tribe constitute final approval on Tribal lands for federal awards or is another funding agency’s approval contingent on the Tribe’s approval/concurrence/consent?
Answer: USDA empowers Tribes to self-certify if they are served by broadband providers or not. If an entity other than the tribe received a federal award to provide broadband service on tribal lands the Tribe can still certify that broadband does not exist on the tribal land.

**Question: Do I need to comply with the Davis-Bacon Act?**

**Answer:** Applicants are not required to comply with the Davis-Bacon Act in order to be eligible to apply. However, applicants may receive 20 points on their application for demonstrating strong labor standards, compliance with and plans for future compliance with labor and employment laws, and a plan to support an appropriately skilled, trained, and credentialed workforce. Applicants may demonstrate strong labor standards by providing documentation that workers will be paid at or above the prevailing rate in accordance with the Davis-Bacon Act.

**Required Documents Inquiries**

**Question: How do I know which organizational documents I need to submit?**

**Answer:** The online application system determines the list of required documents based on the legal entity type chosen. The ReConnect program guide details the required documents for each entity type and will be made available before the application window opens at [https://www.usda.gov/ReConnect](https://www.usda.gov/ReConnect) under “Forms and Resources”.

**Question: To whom should letters of support be addressed?**

**Answer:** Letters of support can be included in your application and can be uploaded to the documents section in the online application system and addressed to:

Assistant Administrator Laurel Leverrier  
Rural Utilities Service Telecommunications Program  
U.S. Department of Agriculture  

**Note:** Letters of support are not required and are not reviewed as part of the application review and evaluation process.

**Evaluation Criteria and Scoring Inquiries**

**Question: Where can I find an explanation of application evaluation points?**
**Answer:** The application evaluation point system is provided in the February 21, 2024, ReConnect NOFO. Evaluation criteria can also be found at https://www.usda.gov/ReConnect. Additional information is provided in the program guide at https://www.usda.gov/ReConnect under “Forms and Resources”.

**Question:** What are the application evaluation criteria?

**Answer:** Please consult the February 21, 2024 ReConnect NOFO for thorough details on evaluation criteria. Applications for loan-grant combinations, 100 percent grants, 100 percent grants for Alaska Native Corporations, and Tribal Governments, Colonias, Persistent Poverty Areas, and Socially-Vulnerable Communities, are scored and ranked against the following criteria:

<table>
<thead>
<tr>
<th>Evaluation Criteria</th>
<th>Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>Rurality of the Proposed Service Area</td>
<td>25</td>
</tr>
<tr>
<td>Economic Need of the Community</td>
<td>20</td>
</tr>
<tr>
<td>Affordability</td>
<td>20</td>
</tr>
<tr>
<td>Labor Standards</td>
<td>20</td>
</tr>
<tr>
<td>Tribal Areas</td>
<td>15</td>
</tr>
<tr>
<td>Local Governments, Nonprofits, and Cooperatives</td>
<td>15</td>
</tr>
<tr>
<td>Socially Vulnerable Communities</td>
<td>15</td>
</tr>
<tr>
<td>Net Neutrality</td>
<td>10</td>
</tr>
<tr>
<td>Most Unserved Locations Per Square Mile</td>
<td>10</td>
</tr>
<tr>
<td><strong>Total:</strong> Up to 150 Points</td>
<td></td>
</tr>
</tbody>
</table>

**Question:** Can you provide more details on how to qualify for the points associated with each element of scoring?

**Answer:** While we recommend you always refer to the ReConnect NOFO, regulation, and program guide for comprehensive guidance, here is a summarization of scoring criteria:

- **Rurality of PFSA (25 points):** Points will be awarded for serving the least dense rural areas as measured by the population of the Proposed Funded Service Area (PFSA) per square mile, or if
the PFSA is located at least 100 miles from a city or town with a population of greater than 50,000 people. If multiple service areas are proposed, the density calculation will be made on the combined areas as if they were a single area; not based on average densities. For population densities of six or less or if the PFSA is located one hundred miles from a city or town of 50,000, 25 points will be awarded.

**Economic need of the community (20 points):** Economic need is based on the county poverty percentage of the PFSA in the application. The percentages must be determined using the United States Census Small Area Income and Poverty Estimates (SAIPE) Program. For applications where 75 percent of the PFSA(s) are proposing to serve communities with a SAIPE score of 20 percent or higher, 20 points will be awarded. Tribal applicants can request alternative scoring consideration by submitting more granular Tribal specific census data using the census.gov/tribal tool. Proposed funded service areas located in geographic areas for which no SAIPE data exist will be determined to have an average SAIPE poverty percentage of 30 percent. Such geographic areas may include territories of the United States or other locations eligible for funding through the ReConnect Program. A GIS layer identifying SAIPE areas can be found in the RUS mapping tool located at https://www.usda.gov/reconnect.

- **Affordability (20 points):** Applicants can receive 20 points if, in their service offerings, they include at least one low-cost option offered at speeds that are sufficient for a household with multiple users to simultaneously telework and engage in remote learning.

- **Labor Standards (20 points):** It is important that necessary investments in broadband infrastructure be carried out in ways that produce high-quality infrastructure and promote efficiency. We understand the importance of promoting workforce development, and we encourage recipients to ensure their broadband projects use strong labor standards consistent with Tribal laws when projects propose to build infrastructure on Tribal Lands. Using these practices in construction projects promotes effective and efficient delivery of high-quality infrastructure and supports economic recovery through employment opportunities for workers, but may also help to ensure a reliable supply of skilled labor that would minimize disruptions, such as those associated with labor disputes or workplace injuries.

  - Applicants should include in their applications a description of whether, and if so, how the project will incorporate three categories of strong labor standards and protections:
    1. Strong labor standards: whether workers (including contractors and subcontractors) will be paid wages at or above the prevailing rate*; whether the
project will be covered by a project labor agreement; and/or whether the project will use a unionized project workforce; and

2. Demonstrated compliance with and plans for future compliance with labor and employment laws: whether the applicant has any violations of tribal, state, or federal labor, workplace safety and health, or employment laws within the last five years; and/or whether the applicant, its contractors, or subcontractors will commit to union neutrality; and/or whether the applicant, its contractors, or subcontractors will commit to permitting workers to create health and safety committees that management will meet with upon reasonable request; and

3. A plan to recruit and support an appropriately skilled, trained, and credentialed workforce (including by contractors and subcontractors): whether work will be performed by a directly employed workforce or whether the employer has policies and practices in place to ensure employees of contractors and subcontractors are qualified; how the applicant will ensure use of an appropriately credentialed workforce (i.e., satisfying requirements for appropriate and relevant pre-existing occupational training, certifications, and licensure); and/or whether a locally based workforce will be used. In addition, the plan should include whether there are any partnerships with training providers, unions, or community colleges to support the recruitment and training of the workforce.

*Prevailing rate means that all laborers and mechanics employed by contractors and subcontractors are paid wages at rates not less than those prevailing, as determined by the U.S. Secretary of Labor in accordance with the Davis-Bacon Act (information available at this link: https://go.usa.gov/xexef). Please refer to the Davis-Bacon Act for all questions pertaining to prevailing wages.

For applicants that commit to strong labor standards, consistent with Tribal laws when the project proposes to build infrastructure on Tribal Lands, 20 points will be awarded. An applicant requesting these points must incorporate components from each of the three categories above. Projects that propose to build infrastructure on Tribal Lands must follow Tribal Laws such as the Tribal Employment Rights Ordinances to be in compliance with a ReConnect award, regardless of receiving points under this standard. The Agency reserves the right to adjust award amounts for unforeseen circumstances.

- **Tribal Lands (10 or 15 points):** For applicants that are Tribal Governments and Tribal Government wholly owned entities and, at least, 75 percent of the geographical area of the
PFSA(s) will provide service on Tribal lands, 15 points shall be awarded. For non-Tribal Governmental entities where at least 50 percent of the geographical area of the PFSA(s) will provide service on Tribal Lands, 10 points shall be awarded. Tribal lands are analyzed using the GIS layers (Tribal Area (BIA LAR); Tribal Supplemental Area (BIA LAR); and Tribal Statistical Area (BIA)) in the RUS mapping tool located at: https://usda.gov/ReConnect. For applicants that are Alaska Native Corporations (ANC) or Alaska Native Tribal Government where at least 50 percent of the geographical area of the PFSA(s) is on Census Tribal areas in Alaska, 15 points shall be awarded. For non-ANC or non-Alaska Tribal Government entities where at least 50 percent of the geographical area of the PFSA(s) is on Census Tribal areas in Alaska, 10 points shall be awarded. Census Tribal areas in Alaska will be analyzed using the GIS layer (Alaska Census Tribal Areas) in the RUS mapping tool located at https://usda.gov/ReConnect.

- **Local governments, nonprofits and cooperatives (15 points):** Applications submitted by local governments, nonprofits or cooperatives (including projects involving public-private partnerships where the local government, nonprofit, or cooperative is the applicant) will be awarded 15 points. As defined by the February 21 2024, ReConnect NOFO, “local government” means “the administration of a particular town, county, or district, with representatives elected by those who live there”, including Tribal Governments.

- **Socially Vulnerable Communities (15 points):** For applications where at least 75 percent of the PFSA(s) propose to serve Socially Vulnerable Communities, as defined in the February 21, 2024, ReConnect NOFO, 15 points will be awarded.

- **Net neutrality (10 points):** For applicants that commit to net neutrality, 10 points will be awarded. A board resolution or its equivalent must be submitted in the application confirming that the applicant’s networks shall not:
  - block lawful content, applications, services, or non-harmful devices, subject to reasonable network management
  - impair or degrade lawful internet traffic on the basis of internet content, application, or service, or use of a non-harmful device, subject to reasonable network management
  - engage in paid prioritization – meaning the management of a broadband provider’s network to directly or indirectly favor some traffic over other traffic – including through use of techniques such as traffic shaping, prioritization, resource reservation, or other forms of preferential traffic management, either (a) in exchange for consideration (monetary or otherwise) from a third party, or (b) to benefit an affiliated entity
• Most Unserved Locations Per Square Mile (up to 10 Points): In order to ensure the
Agency prioritizes funding to States with the highest concentrations of Unserved
Broadband Service Locations (UBSLs) (by percentage and area), projects located in
states that meet these criteria will receive 5 or 10 points. For this notice only, UBSLs
are Broadband Serviceable Locations contained in the FCC’s Broadband Serviceable
Location Fabric that do not have access to a wired or licensed terrestrial fixed
wireless broadband service at speeds of at least 25 Mbps downstream and 3 Mbps
upstream. The states eligible for these points were determined by ranking states
based upon the following criteria:

• The state percentage of Unserved Broadband Service Locations (UBSL)
• The average size of a single UBSL in each state in square miles.

• Point Breakdown: Projects in which at least 75% of the PFSA is located in states
ranked 1 through 5 will receive 10 points. Those states are Alaska, Idaho, Montana,
New Mexico, and Wyoming. Projects in which at least 75% of the PFSA is located in
states ranked 6 thru 10 will receive 5 points. Those states are Arkansas, Mississippi,
Nevada, South Dakota, and West Virginia. For projects in which 75% of the PFSA is
located in more than one of these states, the application will receive the points
associated with the highest scoring state.

• NOTE: Partial points will not be awarded for any scoring criteria.

Question: How will an applicant receive points for Labor Standards?

Answer: Applicants should include in their applications a description of whether, and if so, how the
project will incorporate three categories of strong labor standards and protections:

• Strong labor standards: whether workers (including contractors and subcontractors) will be paid
wages at or above the prevailing rate*; whether the project will be covered by a project labor
agreement; and/or whether the project will use a unionized project workforce; and

• Demonstrated compliance with and plans for future compliance with labor and employment laws:
whether the applicant has any violations of tribal, state, or federal labor, workplace safety and
health, or employment laws within the last five years; and/or whether the applicant, its
contractors, or subcontractors will commit to union neutrality; and/or whether the applicant, its
contractors, or subcontractors will commit to permitting workers to create health and safety
committees that management will meet with upon reasonable request; and
• A plan to recruit and support an appropriately skilled, trained, and credentialed workforce (including by contractors and subcontractors): whether work will be performed by a directly employed workforce or whether the employer has policies and practices in place to ensure employees of contractors and subcontractors are qualified; how the applicant will ensure use of an appropriately credentialed workforce (i.e., satisfying requirements for appropriate and relevant pre-existing occupational training, certifications, and licensure); and/or whether a locally-based workforce will be used. In addition, the plan should include whether there are any partnerships with training providers, unions, or community colleges to support the recruitment and training of the workforce.

For applicants that commit to strong labor standards, consistent with Tribal laws when the project proposes to build infrastructure on Tribal Lands, 20 points will be awarded. An applicant requesting these points must incorporate components from each of the three categories above. Projects that propose to build infrastructure on Tribal Lands must follow Tribal Laws such as the Tribal Employment Rights Ordinances to be in compliance with a ReConnect award, regardless of receiving points under this standard. The Agency reserves the right to adjust award amounts for unforeseen circumstances.

*Prevailing rate means that all laborers and mechanics employed by contractors and subcontractors are paid wages at rates not less than those prevailing, as determined by the U.S. Secretary of Labor in accordance with the Davis-Bacon Act (information available at this link: https://go.usa.gov/xexef). Please refer to the Davis-Bacon Act for all questions pertaining to prevailing wages.

**Question:** How is population density (or rurality) calculated for application points?

**Answer:** For the purposes of the ReConnect Program, rurality is measured in one of two ways:

1. If the population of the proposed funded service area per square mile is 6 or fewer people
2. If the proposed funded service area is located at least 100 miles from a population center (a city or town with a population of greater than 50,000).

If multiple service areas are proposed, the density calculation will be made on the combined areas as if they were a single area, not the average densities. **Note:** areas with population densities with fewer people per square mile will receive the same number of points as areas with 6 or fewer people per square mile. No partial points will be awarded for other densities.
Question: In order to receive 20 points under the Labor Standards scoring criteria, does an applicant need to fully comply with the Davis Bacon Act or do only paid wages need to be at or above Davis Bacon Act prevailing rates?

Answer: In order to receive points under Labor Standards, applicants must address three different labor standards categories. Applicants must demonstrate:

- Strong labor standards;
- Compliance with and plans for future compliance with labor and employment laws; and
- A plan to recruit and support and appropriately skilled, trained, and credentialed workforce.

Applicants may address the strong labor standards category by demonstrating that workers (including employees of contractors and subcontractors) are paid wages at or above the prevailing rate included in subchapter IV of chapter 31 of title 40, United States Code (commonly known as the “Davis-Bacon Act”). Full compliance with the Davis Bacon Act is not required and the funding announcement outlines alternative options to demonstrate strong labor standards. Please note: All three categories noted above must be addressed in order to receive 20 points for Labor Standards.

Question: Are all scoring criteria “all or nothing,” or can partial points be awarded?

Answer: Scoring criteria points are “all or nothing.” Partial points are not awarded under any of the ReConnect scoring criteria. Your application will either receive all points available in a given scoring category, or none.

Certifications Inquiries

Question: Does it matter what type of Professional Engineer (PE) certifies the project?

Answer: All applicants are required to submit a certification covering the following:

- Network Design
- Network Diagram
- Project Costs
- Buildout Timeline and Milestones
- Capital Investment Schedule
All of these must be certified by a Professional Engineer (PE). The PE must be licensed in at least one of the states where the proposed project will be constructed. The selection of the PE does not require prior RUS approval. However, it is the applicant’s responsibility to hire PEs experienced in the design and construction of broadband networks.

**Question:** What certifications must an applicant sign in the ReConnect Online Application System?

**Answer:** You must sign and submit the following certifications within the ReConnect online application system:

- Certification Regarding Architectural Barriers
- Certification Regarding Debarment, Suspension, and Other Responsibility Matters – Primary Covered Transactions
- Certificate Regarding Flood Hazard Area Precautions
- Certification Regarding Lobbying for Contracts, Grants, Loans and Cooperative Agreements
- Civil Rights Compliance Certification
- Federal Collection Policies for Commercial Debt Certification
- Representations Regarding Felony Conviction (Required only for Non-profit, For-profit corporations, and Cooperatives and Mutual Organizations)
- Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 Certification
- Compliance with RUS Award Documents

The only person permitted to sign and certify each item within the online application system is the Representative Signature Certifier (Rep-Sign-Cert).
