2021	427	102	81					601	2,470

* Numbers include vehicles owned by the agency and leased from commercial sources or GSA. The passenger motor vehicles of Rural Development (RD) are used almost exclusively by RD State field office staff in order to provide program delivery to essential facilities, such as services for water and sewer systems, housing, health clinics, emergency service facilities, and electric and telephone services. In the course of their daily work, these personnel often need to travel to communities, individual farms, commercial firms, and State agricultural offices which are only accessible by vehicle.

SALARIES AND EXPENSES LEAD-OFF TABULAR STATEMENT

2020 Enacted	\$697,827,000
Change in Appropriation	63,653,000
Budget Estimate, 2021	761,480,000

APPROPRIATIONS LANGUAGE

The appropriation language follows (new language underscored; deleted matter enclosed in brackets):

Salaries and Expenses

(including transfers of funds)

For necessary expenses for carrying out the administration and implementation of Rural Development programs, including activities with institutions concerning the development and operation of agricultural cooperatives; and for cooperative agreements; [\$247,835,000] <u>\$483,480,000</u>: *Provided*, That notwithstanding any other provision of law, funds appropriated under this heading may be used for advertising and promotional activities that support Rural Development programs: Provided further, That in addition to any other funds appropriated for purposes authorized by section 502(i) of the Housing Act of 1949 (42 U.S.C. 1472(i)), any amounts collected under such section, as amended by this Act, will immediately be credited to this account and will remain available until expended for such purposes: Provided further, That of the amount provided under this heading, \$1,000,000 shall be for the administration of the multifamily voucher program account: Provided further, That of the amount provided under this heading, not less than \$5,000,000 shall be for retiring the Program Loan Accounting System (PLAS); not less than \$5,000,000 shall be for retiring the Automated Multi-family Accounting System (AMAS); and not less than \$5,000,000 shall be for the administration of the direct endorsement option for qualified lenders of the Single Family Loan Guarantee Program as authorized by section 502(h) of the Housing Act of 1949 (42 U.S.C. 1472(h)): Provided further, That of the amount provided under this heading, \$40,000,000, to remain available until expended, shall be for relocation of the Goodfellow facility in St. Louis, Missouri.

The first change includes funding for administrating the multi-family voucher program in the Salaries and Expenses account.

The second change includes three individual set-asides for the retirement of the legacy systems (PLAS & AMAS), as well as the continuation of developing direct endorsement that will enhance the delivery of Section 502 loans guaranteed single family housing loans.

The third change includes language requesting funding for the relocation of the Goodfellow facility located in St. Louis. This change will facilitate the multi-year process of building out and renovating a facility, and furnishings as well as vacating the Goodfellow facility.

SALARIES AND EXPENSES

Rural Development (RD) provides direct and guaranteed loans, grants, payments, and technical assistance to support essential economic development in rural areas. RD's 2021 budget requests will continue to provide funding to strategically support housing, infrastructure, and business development needs across rural America.

The 2021 budget request includes \$3.3 billion in budget authority (BA) to support a total program level (PL) of \$39.8 billion, including \$761.5 million in salaries and expenses.

Administrative funding supports the following operational and lending activities:

- Origination: Origination is primarily done at the State and County level. Without staff in these locations, RD would be unable deliver its programs. Also requested are increases for IT development to support an excellent customer experience, including \$7 million for Broadband application intake.
- Servicing: After loans and grants are provided to the borrowers, servicing starts by monitoring lending activity to ensure that regulations are followed by auditing lending records to ensure fair practices to rural borrowers. This includes monitoring payments, escrows, foreclosures, and portfolio performance. Additionally, functions required by the Federal Credit Reform Act of 1990 are performed including tracking and evaluation of cohort assumptions and development of models that are used to estimate the subsidy rates for origination of new loans as well as re-estimate the cost of RD's existing credit portfolio. As of 2019, RD's portfolio was \$227 billion and will increase by 5 percent over the next two years based on historical obligations.
- Marketing and Outreach: These functions are delivered through a field structure of 477 state, and local offices. All these functions cannot be accomplished without a cadre of highly motivated and trained employees that live and work in these communities.
- Special Assets Unit: RD is developing a mission-wide Special Assets Unit (SAU) to handle borrowers with delinquencies over 90 days. The SAU will focus on developing standards for underwriting loans to be more consistent with commercial loan underwriting standards and will work to develop standardized risk mitigation tools designed to ensure the highest recovery of debt for the American taxpayer.

JUSTIFICATION OF INCREASES/DECREASES

(1) Rural Development Salaries and Expenses (S&E) account: A net increase of \$63,653,000 million from the FY 2020 Appropriations

Rural Development (RD) proposes changes to the 2020 enacted level which are designed to strategically align staff and resources and modernize RD's IT platforms that are essential to accomplishing the operational activities such as; origination, servicing, marketing and outreach, and the Special Assets Unit.

RD's administrative budget will fund FTEs and general operating costs in support of agency programs that include direct and guaranteed loans, grants, and technical assistance for rural community and economic development needs such as housing, business development/

expansion, community facilities, and Broadband. These programs facilitate economic development, prosperity, and enhanced quality of life by assisting rural residents with improved:

- Access to capital
- Infrastructure
- Broadband access and connectivity
- Support for workforce availability

Throughout the year, RD staff interacts with its customers in-person in many places in rural America. To support of the staff working directly with borrowers and lending institutions, the RD administrative budget provides funding to the entire mission area which includes three agencies with unique missions to bring prosperity and opportunity to rural areas through a multitude of services.

RD administrative priorities in the 2021 budget request fall into three categories: 1) maintaining FTE levels and operating expenses to support program increases in three agency programs; 2) request funding for the Goodfellow facility relocation in St. Louis; 3) increase funding for several IT initiatives, including funding for retiring RD IT legacy systems, implementation of direct endorsement and starting the transition from RD IT unique systems to the USDA's CFO's financial system, FMMI.

RD's primary focus is to provide quality customer service to rural America. RD needs personnel in remote counties to support the needs of small communities that don't have access to a variety of credit offers in addition to their tax base being too low to support their community's needs. RD works with state, county and municipal borrowers as well as individuals seeking affordable mortgages and safe, clean rental properties.

A funding change is requested for the following items:

a. An increase of \$4,946,000 for pay costs (\$2,265,000 for annualization of the 2020 pay increase and \$2,681,000 for the 2021 pay increase).

This increase will allow Rural Development to continue to meet its objective to deliver RD programs across rural America. This critical increase is needed to support and maintain current staffing levels to meet the demands of additional program level and support for servicing the portfolio. Without this increase, RD would not be able to support the delivering of about \$39 billion in program level and maintaining the proper servicing of about \$231 billion outstanding debt in the portfolio. Approximately 63 percent of our budget supports personnel compensation and benefits. The 2021 budget requests salaries and benefits to fund 4,600 positions. Their efforts will support economic activities for 60 million rural Americans that live in 3,142 counties across the country.

b. An increase of \$3,574,000 for performance awards.

This increase will support a 1 percent increase in awards spending, consistent with objectives outlined in the President's Management Agenda, to enhance workforce

development. Without this additional funding, RD will be unable to absorb these costs in 2021, resulting in reductions to planned hiring levels, eroding RD's ability to meet key Administration priorities contained in this Budget.

c. An increase of \$4,508,000 for RD's increased contribution to the Federal Employees Retirement System (FERS).

This increase will cover the mandated increase of RD's contribution to FERS for 2021. In 2020, the Office of Personnel Management announced a FERS annuity increase of 2.6 percent and 1.3 percent in 2021.

d. An increase of \$40,000,000 for the Goodfellow facility relocation.

In 2019 the General Service Administration (GSA) recommended that all the agencies occupying the Goodfellow facility in St. Louis, Missouri, be relocated. RD has 1,000 RD employees housed in this facility. The relocation cost will include funding to renovate a facility, update cabling and connectivity, and the purchasing of new furniture as required. The budget request that these funds be available until expended.

e. A net increase of \$48,516,000 for the modernization of the RD IT systems which provides for the following IT projects totaling \$55,516,000 that is offset by \$7,000,000 which is funded through the ReConnect program.

UNIFI Modernization +\$4 million: This increase will allow RD to continue the project to replace the UNIFI Commercial off the Shelf (COTS) product with an application on a modern platform for Single Family Housing Direct. Replacement is critical, as current COTS support for UNIFI will end on 3/31/2021.

OneRD Guaranteed Project + \$7 million: This increase will provide RD with the flexibility to better respond to the 2018 Farm Bill and other legislative requirements by funding improvements throughout loan origination and servicing systems and to combine guaranteed loan programs into a single regulation. These include: 1) Water and Waste Disposal; 2) Community Facilities; 3) Business and Industry; 4) Rural Energy for America Program; and 5) Telecom. It also enables completion of automating application intake, underwriting, review and award functions at an enterprise level.

Reconnect + \$7 million: Continues automation and expands development of the end to end origination and servicing process for Reconnect applications. Assuming functionality has been completed, this funding will allow RUS to standardize processes and completion of Construction Progress Reporting functionality can be achieved. RD is requesting funding to continue the ReConnect pilot, which includes the authority to use up to 3 percent for technical assistance and 4 percent for administration of the program. This funding is available in the program account and will be transferred to S&E for deployment.

Salesforce +\$2.5 million: This increase is requested to ensure funding for all required software licenses, through the Salesforce platform, at FY 2021 rates, plus the addition of readily available Salesforce resources and expertise, reducing dependency on outside

resources available at a higher rate last year.

IT Planning Improvements +\$894,000: This increase will be used to identify and define business IT requirements and to help establish long-term technology roadmaps; improve cybersecurity posture by addressing technological weaknesses and deficiencies; perform analysis and design activity for the Electronic Document Management Publish function; and upgrades for the infrastructure of Automated Mail to incorporate intelligent mail barcode and other automated processes to increase opportunities for postage discounts.

Enhance Data Warehouse Capabilities +\$3 million: Allows completion of the development to enhance/redesign the data warehouse with robust financial and portfolio capabilities, allowing for detailed analysis of program and portfolio data enhanced with predictive analytics to identify where the programs should target their resources. These funds may also be used to enhance data sharing opportunities across federal agencies.

Retirement of Program Loan Accounting System (PLAS) +\$5 million: Allows RD to continue work begun in FY 2020 to replace the legacy PLAS and migrate the loan accounting data to new systems. This effort will culminate in transferring all documentation and transactions to FMMI.

Retirement of Automated Multifamily Accounting System (AMAS) +\$5 million: Allows RD to continue work begun in FY 2020 to replace the legacy AMAS and migrate the loan accounting data to new systems. This effort will culminate in transferring all documentation and transactions to FMMI.

Single Family Direct Endorsement +\$5 million: Allows RD to enhance systems necessary to delegate approval authority to preferred lenders in a practical manner, per the Housing Opportunity Through Modernization Act of 2016, using the best practices from the VA and HUD IT systems.

Consolidated Administrative & IT Cost for the Voucher Program: + \$1 million: Moves the administrative and IT request from the Voucher Program to the Salaries and Expenses account.

Funding to migrate financial legacy system to the USDA financial system FMMI +\$15 million: The funding is provided to migrate financial transactions that are housed and done in AMA and PLAS for RD loans and grants into the Chief Financial Officer of the Department. This will improve transparency, monitoring and reporting of financial data.

f. A decrease of \$37,891,000 of non-IT and IT contracts from the 2020 enacted Appropriations

In order to increase FTEs to the level mandated by Congress, RD will need to reduce non-IT professional services contracts and IT contracts and improvements. These contracts were originally set up to manage the loan and grant program and to service the portfolio, which is expected to be \$231 billion in 2021. The reduction will not have a significant impact in the operation of the agency.

SUMMARY OF PERFORMANCE

USDA Rural Development (RD) is committed to improving the economy and quality of life in rural America. RD offers direct and guaranteed loans and grants to help create jobs and support economic development and essential services such as housing, health care, first responder services and equipment, and water, electric and communications infrastructure in rural areas. RD provides technical assistance to help communities undertake community empowerment programs.

The programs operated by RD support the Secretary's Strategic Goal 4: Facilitate rural prosperity and economic development. RD serves a leading role in facilitating rural prosperity and economic development by financing investments in rural utilities, housing, and business investments. To more effectively track program performance to meet Strategic Goal 4, RD implemented a revised Key Performance Indicator (KPI) on leverage and introduced a new KPI on distressed communities in FY19.

Leverage is now defined as "the total dollar amount of financial contributions from both the applicant and other non-Federal sources alongside an RD grant, loan, or guarantee during time of obligation. For guarantees, leverage includes the total dollar amount of the guaranteed loan." The cost-share definition of leverage is a financial proxy for RD partnerships and a measure of the efficient and effective use of taxpayer dollars to facilitate rural prosperity.

The Distressed Communities KPI uses the Distressed Communities Index developed by Economic Innovation Group (EIG) that combines seven complementary economic indicators into a single holistic and comparative measure of community well-being. This KPI is designed to promote and capture RD strategic investment for rural prosperity by focusing on distressed communities. The KPI will be measured by percentage of overall RD funds that are being invested in distressed communities.

КРІ	2018 Actual	2019 Actual	2020 Target	2021 Target
RD commercial/infrastructure investments that leverage non-Federal funding		83%	79%	80%
RD funds (overall) that are being invested in distressed communities	11%	11%	13%	14%

SELECTED PAST ACCOMPLISHMENTS TOWARD THE ACHIEVEMENT OF THE KPI OUTCOMES

The FY 2019 leverage target was exceeded by 5 percent points; 83 percent of RD commercial/infrastructure investments being were leveraged with non-Federal funding. This accounted for \$9.2 billion of additional investments in rural communities.

The FY 2019 distressed communities target of 12 percent was not met, but RD investments were maintained at 11 percent, which accounted for over \$3.2 billion of support in rural communities

of greatest need. Furthermore, 70 percent of RD programs met or exceeded the 12 percent distressed communities target.

SELECTED ACCOMPLISHMENTS EXPECTED AT THE 2021 PROPOSED RESOURCE LEVEL

Targets established under the Leverage KPI are based on the understanding that there are still opportunities to strengthen or expand RD partnerships leading to an even higher percentage of RD investments being leveraged by non-Federal funds. Given the already high-performance level of RD leveraging non-Federal funds, targets established for FY 2020 and FY 2021 show modest but meaningful gains of 1 percent annually over the FY 2018 baseline. If the FY 2021 leverage target of 80 percent is met or exceeded, this would mean at least \$8.8 billion of additional investments in rural communities (assumes an obligation rate of at least \$11 billion for FY 2021 of RD commercial/infrastructure investments).

When RD strategically targets communities of greatest need (e.g. high poverty), these investments achieve sustained community impact. The Distressed Communities KPI provides a more nuanced depiction of these communities and further efforts to target these communities should achieve similar results. As such, RD is looking to increase investment in distressed communities by 1 percent annually with the goal of reaching 15 percent by FY 2022. While a 1 percent increase annually may seem modest, reaching the 15 percent target by FY 2022 would mean over \$4.5 billion of RD investments to support distressed communities (assumes an obligation rate of at least \$30 billion for FY 2022).
